At the Mountains of Madness H.P. Lovecraft, 2005-06-14 Introduction by China Miéville Long acknowledged as a master of nightmarish visions H P Lovecraft established the genuineness and dignity of his own pioneering fiction in 1931 with his quintessential work of supernatural horror At the Mountains of Madness The deliberately told and increasingly chilling recollection of an Antarctic expedition's uncanny discoveries and their encounter with untold menace in the ruins of a lost civilization is a milestone of macabre literature This exclusive new edition presents Lovecraft's masterpiece in fully restored form and includes his acclaimed scholarly essay Supernatural Horror in Literature This is essential reading for every devotee of classic terror *The Secret Life of Puppets* Victoria Nelson, 2003-11-01 In one of those rare books that allows us to see the world not as we've never seen it before but as we see it daily without knowing Victoria Nelson illuminates the deep but hidden attraction the supernatural still holds for a secular mainstream culture that forced the transcendental underground and firmly displaced wonder and awe with the forces of reason materialism and science In a backward look at an era now drawing to a close The Secret Life of Puppets describes a curious reversal in the roles of art and religion where art and literature once took their content from religion we came increasingly to seek religion covertly through

art and entertainment In a tour of Western culture that is at once exhilarating and alarming Nelson shows us the distorted forms in which the spiritual resurfaced in high art but also strikingly in the mass culture of puppets horror fantasy literature and cyborgs from the works of Kleist Poe Musil and Lovecraft to Philip K Dick and virtual reality simulations At the end of the millennium discarding a convention of the demonized grotesque that endured three hundred years a Demiurgic consciousness shaped in Late Antiquity is emerging anew to re divinize the human as artists like Lars von Trier and Will Self reinvent Expressionism in forms familiar to our pre Reformation ancestors Here as never before we see how pervasively but unwittingly consuming art forms of the fantastic we allow ourselves to believe **Writing the Mountains** Jens

Klenner,2024-05-16 Writing the Mountains reconsiders the role of mountains in German language fiction from 1800 to the present and argues that in a range of texts from E T A Hoffmann's Die Bergwerke zu Falun 1819 to Elfriede Jelinek's Die Kinder der Toten 1995 and beyond mountains serve as dynamic spaces of material change that generate aesthetic and narrative innovation In contrast to dominant critical approaches to the Alpine landscape in literature in which mountain ranges often features as passive settings or which trace the influence of geographical and geological sciences in literary productions this study argues for the dynamic role in literature of presumably rigid mineral structures In German language fiction after 1800 the counter intuitive topology of rocky mountain ranges and unfathomable subterranean depths of the Alpine imaginary functions as a space of exception which appears to reconfirm and radically challenge the foundations of Enlightenment thought Writing the Mountains reads the mountain range as a rigid yet permeable liminal space Within this zone semiotic orders are unsettled as is the division between organic and inorganic between the human and the other
