John Addington Symonds

Madrigals Iv And V:

First [and Second] Set of Madrigals to 3. 4. 5. and 6 Voices John Wilbye, 1914 Music History During the Renaissance Period, 1520-1550 Blanche M. Gangwere, 2004-10-30 This annotated chronology of western music is the third in a series of outlines on the history of music in western civilization It contains a 120 page annotated bibliography followed by a detailed documented outline that is divided into ten chapters Each chapter is written in chronological order with every line being documented by means of abbreviations that refer to the annotated bibliography There are short biographies of the theorists and detailed discussions of their works The information on music is organized by classes of music rather than by composer Also included are lists of manuscripts with descriptions of their contents and notations as to where they may be found The material for the outline has been taken from primary and secondary sources along with articles from periodicals Like the other two volumes in this series *Music History from the Late Roman through the Gothic Periods* 313 1425 and *Music History During the Renaissance Period* 1425 1520 this volume will be an important research tool for anyone interested in music history **Monteverdi and the End of the Renaissance** Gary Tomlinson, 1990-07-09 Combining a close study of

Monteverdi's secular works with recent research on late Renaissance history Gary Tomlinson places the composer's creative career in its broad cultural context and illuminates the state of Italian music poetry and ideology in the sixteenth and seventeenth centuries **Giovanni Pierluigi da Palestrina** Clara Marvin, 2013-10-15 First Published in 2002 This guide introduces students and scholars to the literature on Palestrina as well as the complicated history of the publication of his works This bibliography is divided into four primary sections historical background on musical social and cultural life biographical literature studies of sources music and style and reception history They are divided roughly into the periods dating from Palestrina's lifetime to about 1750 from about 1750 to about 1914 from 1914 to the present This title also contains historical research on performance conditions and practices as they would have applied in Palestrina's time

Music and Musicians in 16th-Century Florence Frank A. D'Accone, 2023-05-31 This second selection of studies by Frank D'Accone again based principally on the documentary evidence follows the development through the mid 16th century of musical chapels at the Cathedral and the Baptistery of Florence and of musical establishments at the Santissima Annunziata and San Lorenzo The lives careers and works of composers associated with these churches are illustrated and their works analyzed particularly the theoretical treatise by Fra Mauro the madrigals of Mauro Matti and the ambitiously conceived canzone cycle of Mattia Rampollini The final studies moving into the 17th century look at the music for Holy Week and the unprecedented programme of performances at Santa Maria Novella *The Best Books: H, Natural science. H*, Medicine and surgery. I, Arts and trades* William Swan Sonnenschein, 1926 *The Italian Madrigal* Alfred Einstein, 2019-08-06 Volume 2 of 3 This monumental three volume work on the Italian madrigal from its beginnings about 1500 to its decline in the 17th century is based on the research of 40 years and is a cultural history of the development of

Italian music Mr Einstein renowned musicologist supplies a background and a sense of proportion to the field he gives the right order to the single composers in the evolution of the madrigal attaches new values to old names and places in the foreground the outstanding but until now rather neglected personality of Cipriano de Rore His work is not however purely musicological his object is to inquire into the functions of secular music in Italian life during the Cinquecento and to contribute to our knowledge and understanding of that great century in general Translated from the German by Oliver Strunk Roger Sessions and Alexander H Krappe Originally published in 1948 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Music in the Middle Ages and the Renaissance Harold Gleason, Warren Becker, 1981 This is a complete revision of the second edition designed as a guide and resource in the study of music from the earliest times through the Renaissance period The authors have completely revised and updated the bibliographies in general they are limited to English language sources In order to facilitate study of this period and to use materials efficiently references to facsimiles monumental editions complete composers works and specialized anthologies are given The authors present this systematic organization in this volume in the hope that students teachers and performers may find in it a ready tool for developing a comprehensive understanding of the music of this period *H, Natural science. H*, Medicine and surgery. I, Arts and trades. 1926* William Swan Sonnenschein, 1926 *The Best Books: H, Natural science. H*, Medicine and surgery. I, Arts and trades. 1926* William Swan Sonnenschein, 1926 **The Best Books** William Swan Sonnenschein, 1926 **A Poetry-book of Elder Poets** Amelia Ann Blanford Edwards, 1878 **Harvard Dictionary of Music** Willi Apel, 1969 Contains nearly 1000 pages of precise and accessible information on all musical subjects **English Madrigal Verse, 1588-1632** Edmund H. Fellowes, 1920 **The Madrigal** Susan Lewis Hammond, 2012-08-06 The Madrigal A Research and Information Guide is the first comprehensive annotated bibliography of scholarship on virtually all aspects of madrigal composition production and consumption It contains 1 237 entries for items in English French German and Italian Scholars students teachers librarians and performers now have access to this rich literature in a single volume **Donovan** Lyall, 1890 **Mrs. Dymond** Anne Thackeray Ritchie, 1886 *Renaissance in Italy: Italian literature* John Addington Symonds, 1900 *Renaissance In Italy The Catholic Reaction In Two Parts* John Addington Symonds, 1904 *Adrian Willaert and the Theory of Interval Affect* Dr Timothy R McKinney, 2013-01-28 In the writings of Nicola Vicentino 1555 and Gioseffo Zarlino 1558 is found for the first time a systematic means of explaining music s expressive power based upon the specific melodic and harmonic intervals from which it is constructed This theory of interval affect originates not with these theorists however but with their teacher influential

Venetian composer Adrian Willaert 1490 1562 Because Willaert left no theoretical writings of his own Timothy McKinney uses Willaert's music to reconstruct his innovative theories concerning how music might communicate extramusical ideas For Willaert the appellations major and minor no longer signified merely the larger and smaller of a pair of like numbered intervals rather they became categories of sonic character the members of which are related by a shared sounding property of majoriness or minoriness that could be manipulated for expressive purposes This book engages with the madrigals of Willaert's landmark *Musica nova* collection and demonstrates that they articulate a theory of musical affect more complex and forward looking than recognized currently The book also traces the origins of one of the most widespread musical associations in Western culture the notion that major intervals chords and scales are suitable for the expression of happy affections and minor for sad ones McKinney concludes by discussing the influence of Willaert's theory on the madrigals of composers such as Vicentino Zarlino Cipriano de Rore Girolamo Parabosco Perissone Cambio Francesco dalla Viola and Baldassare Donato and describes the eventual transformation of the theory of interval affect from the Renaissance view based upon individual intervals measured from the bass to the Baroque view based upon invertible triadic entities
