Magic And Medicine:

Mystery, Magic and Medicine Howard Wilcox Haggard, 1933 A concise history of scientific medicine Copiously illustrated There is probably no more fascinating story than that of the rise of scientific medicine Its beginnings were in mystery and superstition its progress encumbered with ignorance and quackery Above these it has risen to become the most beneficent science of the modern world *Magic Or Medicine?* Robert Buckman, 1995-05 a fascinating informative complete and objective picture including descriptions history comparisons and case studies about traditional and complementary medicine Highly recommended for health professionals faculty and students at all levels Choice Modern medicine is one of the most successful branches of science with a distinguished history of conquering many of the twentieth century s deadliest diseases Yet today people are turning in record numbers to alternative therapies that have little or no scientific basis What accounts for this flight from reason in the face of hard evidence that medical doctors do a better job of treating disease and alleviating suffering than their alternative counterparts In *Magic or Medicine* Dr Robert Buckman and Karl Sabbagh offer a response to this question by critically evaluating both alternative and conventional medical approaches to patient care The authors argue that healing has always been partly the science of clinical treatment medicine and partly an art magic Medicine may make the patient get well but often it is magic that makes the patient feel well With all the pressures under which they work modern medical doctors often neglect the magic in their dealings with patients Alternative therapists however frequently offer nothing but magic Buckman and Sabbagh look closely at the claims made for both medical science and alternative treatments and discover a gap between the promises and the reality of each approach *Magic or Medicine* is vital reading for anyone concerned about the effective delivery of healthcare Robert Buckman Ph D FRCP is a cancer specialist and assistant professor at the Toronto Bayview Regional Cancer Centre at Sunnybrook Hospital University of Toronto He is also the current president of the Humanist Association of Canada Among his previous books are *How to Break Bad News* and *I Don t Know What to Say How to Help and Support Someone Who Is Dying* Karl Sabbagh M A is a television producer whose credits include *The Body in Question* with Dr Jonathan Miller He is also the author of numerous books on scientific and medical topics including *The Living Body A Guide to How the Body Works* , *Murder, Magic, and Medicine* J. Mann, 2000 People have always been curious about the plants and animals with which they coexist Primitive cultures identified edible and poisonous plants largely by trial and error and then used them for hunting executions euthanasia and magico religious rites as well as for their medicinal properties In this fascinating book John Mann investigates the evolution of modern medicine from its roots in folk medicine and reveals the continuing importance of natural plant and animal products many of which remain undiscovered but under threat by the wholesale destruction of the Earth s wild places In this new edition he has updated the material to include discussion of the background to some of the most talked about drugs of recent years including Prozac and Viagra *Mystery, Magic and Medicine* Howard W.

Haggard,1978-02-01 Anglo-Saxon Magic and Medicine John Henry Grafton Grattan,Charles Singer,1952 **Magic Or Medicine?** Rob Buckman,1995 Modern medicine is one of the most successful branches of science with a distinguished history of conquering many of the twentieth century s deadliest diseases Yet today people are turning in record numbers to alternative therapies that have little or no scientific basis Herbalists homeopaths crystal therapists chiropractors acupuncturists and countless other unconventional practitioners are enjoying thriving businesses What accounts for this flight from reason in the face of hard evidence that medical doctors do a better job of treating disease and alleviating suffering than their alternative counterparts In *Magic or Medicine* Dr Robert Buckman and Karl Sabbagh offer a response to this question by critically evaluating both alternative and conventional medical approaches to patient care Drawing on some of the earliest written medical sources as well as their own investigations into current alternative therapies the authors argue that healing has always been partly the science of clinical treatment medicine and partly an art magic Medicine may make the patient get well but often it is magic that makes the patient feel well With all the pressures under which they work modern medical doctors often neglect the magic in their dealings with patients Alternative therapists however frequently offer nothing but magic Buckman and Sabbagh look closely at the claims made for both medical science and alternative treatments and discover a gap between the promises and the reality of each approach *Magic or Medicine* is a fascinating exploration of healing in the late twentieth century and vital reading for anyone concerned about the effective delivery of health care *Murder, Magic, and Medicine* John Mann,1994 This absorbing account of the evolution of modern medicine from its roots in folk medicine will entertain and inform both scientist and general reader alike It explains the chemical basis of pharmacology and provides a fascinating description of how the use and abuse of natural products in various societies throughout the ages has led to the development of many of the drugs we now take for granted **Magic Or Medicine?** Robert Buckman,Karl Sabbagh,1993 Material Approaches to Roman Magic Adam Parker,Stuart McKie,2018-04-30 This second volume in the new TRAC Themes in Roman Archaeology series seeks to push the research agendas of materiality and lived experience further into the study of Roman magic a field that has until recently lacked object focused analysis Building on the pioneering studies in Boschung and Bremmer s 2015 *Materiality of Magic* the editors of the present volume have collected contributions that showcase the value of richly detailed context specific explorations of the magical practices of the Roman world By concentrating primarily on the Imperial period and the western provinces the various contributions demonstrate very clearly the exceptional range of influences and possibilities open to individuals who sought to use magical rituals to affect their lives in these specific contexts something that would have been largely impossible in earlier periods of antiquity Contributions are presented from a range of museum professionals commercial archaeologists university academics and postgraduate students making a compelling case for strengthening lines of communication between these related areas of expertise Magical Medicine Wayland D. Kirkland, Holly F. Matthews, Charles W. Sullivan III, Karen Baldwin, 1992-01-30 Herbal and Magical Medicine draws on perspectives from folklore anthropology psychology medicine and botany to describe the traditional medical beliefs and practices among Native Anglo and African Americans in eastern North Carolina and Virginia In documenting the vitality of such seemingly unusual healing traditions as talking the fire out of burns wart curing blood stopping herbal healing and rootwork the contributors to this volume demonstrate how the region's folk medical systems operate in tandem with scientific biomedicine The authors provide illuminating commentary on the major forms of

naturopathic and magico religious medicine practiced in the United States Other essays explain the persistence of these traditions in our modern technological society and address the bases of folk medical concepts of illness and treatment and the efficacy of particular practices The collection suggests a model for collaborative research on traditional medicine that can be replicated in other parts of the country An extensive bibliography reveals the scope and variety of research in the field Contributors Karen Baldwin Richard Blaustein Linda Camino Edward M Croom Jr David Hufford James W Kirland Peter Lichstein Holly F Mathews Robert Sammons C W Sullivan III *Perspectives in Religious Studies: Volume I* Adelowo, E.
