More Than Color:

Encyclopedia of Food and Color Additives George A. Burdock, 1997 A 3 volume reference set you'll use every day. Suppose you are the regulatory affairs manager for a food company and your boss calls about beet red a coloring agent touted by a salesman as natural. Your boss needs to know if this claim is true. How do you find out? Perhaps you are an attorney for a company manufacturing ethnic marinade mixes and a customer charges that the chemical cinnamaldehyde which the mixes contain is being tested for carcinogenicity by the National Toxicology Program. Is your company manufacturing food that is potentially toxic? With the Encyclopedia of Food and Color Additives the answers are at your fingertips. You quickly look up Beet Red and find it is indeed natural a product of edible beets. You are able to assure your boss that the claim is valid. After consulting the Encyclopedia you calmly inform the customer that cinnamaldehyde is not only approved for use in food but it is a primary constituent of cinnamon a common household spice. The Encyclopedia provides you with a quick understandable description of what each additive is and what it does where it comes from when its use might be limited and how it is manufactured and used. What FDA or PAFA name Listed in bold is the name by which the FDA classifies the substance. List of Synonyms From the Chemical Abstract the IUPAC name and the common or folklore name for natural products are listed. Standardized names are provided for each substance. The most commonly used names are in bold type. Current CAS Number The current FDA number for the substance. Other CAS Numbers Numbers used previously or that are used by TSCA or EINECS to identify the substance. Empirical Formula Indicates the relative proportion of elements in a molecule. Specifications Includes melting point boiling point optical rotation specific gravity and more. Where Description Where the substance is grown how it is cultivated gathered and brought to market how it gets into food species and subspecies producing this commodity differences in geographical origin and how it impacts the quality of the product. Natural Occurrence Lists family genus and species. Explains variances between the same substance grown and cultivated in different geographies. Natural Sources For synthetic or nature identical substances the Encyclopedia provides a list of foods in which a substance is naturally found. When GRAS status Generally Recognized as Safe status as established by the Flavor and Extract Manufacturer's Association FEMA or other GRAS panels. Regulatory Notes This citation gives information about restrictions of amount use or processing of substances. Table of Regulatory Citations Lists CFR numbers and description of permitted use categories. How Purity For some substances there are no purity standards. Here current good manufacturing practices are reported as gathered from various manufacturers. Allows you as the consumer to know what is available and standard in the industry. Functional Use in Food The FDA has 32 functions for foods such as processing aids antioxidants stabilizers texturizers etc. Lists the use of the particular substance as it functions in food products. You get all this data plus an index by CAS number and synonym to make your research even easier. The Encyclopedia of Food and Color Additives sorts through the technical language used in the laboratory or factory the arcane terms used by regulatory managers and the legalese used

by attorneys providing all the essentials for everyone involved with food additives Consultants lawyers food and tobacco scientists and technicians toxicologists and food regulators will all benefit from the detailed well organized descriptions found in this one stop source Code of Federal Regulations United States.
