On The Beginning Of Social Inquiry:

On the Beginning of Social Inquiry Peter McHugh, 1974 **Dewey's Logical Theory** F. Thomas Burke, D. Micah Hester, Robert B. Talisse, 2002 Despite the resurgence of interest in the philosophy of John Dewey his work on logical theory has received relatively little attention Ironically Dewey's logic was his first and last love The essays in this collection pay tribute to that love by addressing Dewey's philosophy of logic from his work at the beginning of the twentieth century to the culmination of his logical thought in the 1938 volume *Logic: The Theory of Inquiry* All the essays are original to this volume and are written by leading Dewey scholars Ranging from discussions of propositional theory to logic's social and ethical implications these essays clarify often misunderstood or misrepresented aspects of Dewey's work while emphasizing the seminal role of logic to Dewey's philosophical endeavors This collection breaks new ground in its relevance to contemporary philosophy of logic and epistemology and pays special attention to applications in ethics and moral philosophy *The Reflexive Initiative* Stanley Raffel, Barry Sandywell, 2016-03-31 The Reflexive Initiative is an authoritative intervention in the practice and tradition of reflexive social theory It demonstrates the importance of the reflexive imperative not only in the investigation of everyday life but across a wide range of human sciences and philosophical perspectives Forty years after the publication of *On the Beginning of Social Inquiry* the chapters in this collection range from re appraisals of earlier essays on topics such as reunions rethinking art and expats to contributions emphasising the opening of radical dialogues with other reflexive traditions and perspectives These include psychoanalysis Lacan Hegel Rene Girard Daseinanalysis dialectical method critical feminism and the dialogical tradition In this dialogical spirit the book contributes to the continuing project of analytic theorizing associated with the work of Alan Blum and Peter McHugh and the recent turn to more existential topics and politically engaged forms of reflexive research It will be of particular use to students working in interpretive traditions of sociology Critical theory Postmodern thought and debates associated with reflexivity and dialectics in other disciplines and research programmes *On the Beginning of Social Inquiry. [By] Peter McHugh ... Stanley Raffel ... Daniel C. Foss ... Alan F. Blum* Peter MACHUGH, 1974 *Essays on the History of British Sociological Research* Martin Bulmer, 1985-02-07 Traces the history of British sociology and empirical social research over the past hundred years Concludes with a discussion of the applications of the research including the use of social surveys for policymaking and the success of social science in predicting the future *History at the End of the World* Mark Levene, Rob Johnson, Penny Roberts, 2010 The authors of this collection of essays propose that climate change means serious peril The approaches begin from archaeology literature religion psychology sociology philosophy of science engineering and sustainable development as well as straight history Our argument however is not about the science per se It is about us our deep and more recent history and how we arrived at this calamitous impasse With contributions from academic activists and independent researchers *History at the End of the World* challenges advocates of business as usual to think again But in its wide ranging assessment of how we transcend the current

crisis it also proposes that the human past could be our most powerful resource in the struggle for survival **Karl Popper, Science and Enlightenment** Nicholas Maxwell, 2017-09-26 Here is an idea that just might save the world It is that science properly understood provides us with the methodological key to the salvation of humanity A version of this idea can be found in the works of Karl Popper Famously Popper argued that science cannot verify theories but can only refute them and this is how science makes progress Scientists are forced to think up something better and it is this according to Popper that drives science forward But Nicholas Maxwell finds a flaw in this line of argument Physicists only ever accept theories that are unified theories that depict the same laws applying to the range of phenomena to which the theory applies even though many other empirically more successful disunified theories are always available This means that science makes a questionable assumption about the universe namely that all disunified theories are false Without some such presupposition as this the whole empirical method of science breaks down By proposing a new conception of scientific methodology which can be applied to all worthwhile human endeavours with problematic aims Maxwell argues for a revolution in academic inquiry to help humanity make progress towards a better more civilized and enlightened world **Case Studies and Causal Inference** I. Rohlfing, 2012-09-26 A discussion of the case study method which develops an integrative framework for causal inference in small n research This framework is applied to research design tasks such as case selection and process tracing The book presents the basics state of the art and arguments for improving the case study method and empirical small n research **The Reflexive Thesis** Malcolm Ashmore, 1989-08-02 This unusually innovative book treats reflexivity not as a philosophical conundrum but as a practical issue that arises in the course of scholarly research and argument In order to demonstrate the concrete and consequential nature of reflexivity Malcolm Ashmore concentrates on an area in which reflexive problems are acute the sociology of scientific knowledge At the forefront of recent radical changes in our understanding of science this increasingly influential mode of analysis specializes in rigorous deconstructions of the research practices and textual products of the scientific enterprise Through a series of detailed examinations of the practices and products of the sociology of scientific knowledge Ashmore turns its own claims and findings back onto itself and opens up a whole new era of exploration beyond the common fear of reflexive self destruction **Exploring the Interactional Instinct** Anna Dina L. Joaquin, John H. Schumann, 2013-12 Examines interaction in second language acquisition in different cultures in different species in observation without participation in literacy in schizophrenia in relation to human physiological responses and in relation to correlated perspectives on interaction
