The Bright and the Dark Sides of the Universe

The first publication of the "Astronomische Gesellschaft" (AG), the *Vierteljahresschrift der Astronomischen Gesellschaft*, was established back in 1866. However, its last volume was published in 1944. From 1949 to 1987 the so-called *Mitteilungen der Astronomischen Gesellschaft* was the only publication of the society. It still was almost exclusively written in German. The individual issues comprised scientific papers, annual reports of the observatories and astronomical institutes of Germany, Austria, and Switzerland, and administrative business matters of the AG. Typically two or three issues appeared each year. In 1988 the AG edited the first volume of a new series of publications, the *Reviews in Modern Astronomy*.

In order to make the scientific events of the meetings of the AG more international and bring them to the attention of the worldwide astronomical community, it was decided to devote the *Reviews in Modern Astronomy* to the products of the large annual fall meetings of the AG, now written solely in English. In particular, it emphasized the Karl Schwarzschild Lectures, the Ludwig Biermann Award Lectures, the invited reviews, and the highlight contributions on recent progress and achievements from leading scientists. The most prestigious of them, the Karl Schwarzschild Lectures, constitutes a special series of reviews by outstanding scientists who have been awarded the Karl Schwarzschild Medal during the fall meeting of the AG. At the same time, excellent young astronomers are honored by the Ludwig Biermann Award. In 2010 the "Doctoral Thesis Award" was established to honor the most outstanding Doctoral Thesis of the past year.

Starting last year the *Reviews in Modern Astronomy* will appear in the *Astronomische Nachrichten/Astronomical Notes* (AN), one of the first international journals in the field of astronomy founded in 1821. Although issues of this journal require a subscription, the papers of the annual *Reviews in Modern Astronomy* are available free in the Wiley Online Library.

The current issue of AN is Volume 25 of the *Reviews in Modern Astronomy* and presents selected papers given at the International Scientific Conference of the Society on "The Bright and the Dark Sides of the Universe" held in Hamburg, Germany, September 24–28, 2012. It was the sixth time that Hamburg hosted a meeting of the AG, in 2012 commemorating the 100th anniversary of the Hamburg Observatory in Hamburg-Bergedorf. The meeting was attended by more than 300 participants from around the world.

The Karl Schwarzschild Medal 2012 was awarded to Professor Sandra M. Faber, Santa Cruz (CA, USA). Her lecture with the title "LambdaCDM Galaxy Formation: A 30-Year Status Report" opened the meeting. The manuscript of the Karl Schwarzschild lecture will not be published. The talk presented by the Ludwig Biermann Award winner 2012, Dr. Cecilia Scannapieco, Potsdam, dealt with the topic "Cosmological Simulations of Galaxy Formation: Successes and Challenges in the Era of Supercomputers". The Doctoral Thesis Award 2012 was awarded to Dr. Julius Donnert, Bologna. In his lecture he discussed the subject "Modelling giant radio halos". Other contributions to the meeting, and published in this issue, compare the "bright" with the "dark" sides of the Universe and discuss, among other subjects, the future science potential of SOFIA, the different aspects of magnetic fields in the Universe, exoplanets and first stars, and the LOFAR view of cosmic magnetism.

The AG would like to thank the lecturers for their stimulating presentations. Thanks also to the local organizing committee from the "Hamburg Observatory", chaired by Dieter Engels.
