Pakistan From Mountains To Sea:

Pakistan Mohamed Amin,Duncan Willetts,Brendan Farrow,1994 **India and Nuclear Asia** Yogesh Joshi, Frank O'Donnell,2018-11-01 India s nuclear profile doctrine and practices have evolved rapidly since the country s nuclear breakout in 1998 However the outside world s understanding of India s doctrinal debates forward looking strategy and technical developments are still two decades behind the present India and Nuclear Asia will fill that gap in our knowledge by focusing on the post 1998 evolution of Indian nuclear thought its arsenal the triangular rivalry with Pakistan and China and New Delhi s nonproliferation policy approaches Yogesh Joshi and Frank O Donnell show how India s nuclear trajectory has evolved in response to domestic regional and global drivers The authors argue that emerging trends in all three states are elevating risks of regional inadvertent and accidental escalation These include the forthcoming launch of naval nuclear forces within an environment of contested maritime boundaries the growing employment of dual use delivery vehicles and the emerging preferences of all three states to employ missiles early in a conflict These dangers are amplified by the near absence of substantive nuclear dialogue between these states and the growing ambiguity of regional strategic intentions Based on primary source research and interviews this book will be important reading for scholars and students of nuclear deterrence and India s international relations as well as for military defense contractor and policy audiences both within and outside South Asia

Earth's Landscape Joyce A. Quinn,Susan L. Woodward,2015-02-03 This unusual encyclopedia brings together in depth information on more than 450 natural geographic features from around the world and offers an array of creative tools to promote critical thinking and classroom discussion With Earth undergoing rapid environmental change students and the general public alike should be knowledgeable about the world s geographic features This authoritative two volume reference enables readers do just that It describes continents and oceans individual mountains islands caves and rivers and ecological entities such as wildlife refuges and national parks Each entry provides a geographic overview of the feature s significance location description geologic history biota protected areas and environmental issues But the coverage goes even deeper so that entries also discuss the cultural importance of each natural place covering everything from indigenous beliefs to traditional folklore to contemporary legends The encyclopedia

stands apart from other works not only in the depth of its coverage but also in its range. It discusses lesser known as well as prominent geographical features and offers critical thinking aids that will help students see how the natural world relates to their daily lives. Teaching and learning tools include an appendix called Opposing Viewpoints that allows students to understand landforms involved in current conflicts and disputes as well as an Activities Discussion Questions appendix.

The Formation of Mountains Florian Neukirchen, 2022-11-28 Mountains as we know them were formed by a wide range of processes. This vivid introduction explains the course of orogeny, mountain formation and the resulting structures, the cycles of plate tectonics and the evolution of landforms. It also presents surprising findings from the latest research. Popular travel destinations are described in detail, ideal when preparing for a trip, while a wealth of photos and graphics illustrate the text. Why are mountains as tall as they are? How does high pressure rock come to the surface? Is there feedback between tectonics and the climate? How can mountains form without continental collision far away from any plate boundaries? And how do we know all this? These and many other questions will be answered. Mountain agriculture: Opportunities for harnessing Zero Hunger in Asia Food and Agriculture Organization of the United Nations, 2019-08-07 Mountain food security and nutrition are core issues that can contribute positively to the achievement of the Sustainable Development Goals but paradoxically are often ignored in Zero Hunger and poverty reduction related agenda. Under the overall leadership of Jos Graziano da Silva, the Former Director General of FAO, sustainable mountain agriculture development is set as a priority in Asia and the Pacific to effectively address this issue and assist Member Countries in tackling food insecurity and malnutrition in mountain regions. This comprehensive publication is the first of its kind that focuses on the multidimensional status, challenges, opportunities and solutions of sustainable mountain agriculture development for Zero Hunger in Asia. This publication is building on the International Workshop and Regional Expert Consultation on Mountain Agriculture Development and Food Security and Nutrition Governance held by FAO RAP and UIR in November 2018, Beijing, in collaboration with partners from national governments, national agriculture institutes, universities, international organizations and international research institutes. The publication provides analysis with evidence on how mountain agriculture could contribute to satisfying all four dimensions of food security to transform food systems to be nutrition sensitive, climate resilient, economically viable and locally adaptable. From this food system perspective, the priority should be given to focus on specialty mountain product identification, e.g. Future Smart Food production, processing, marketing and consumption, which would effectively expose the potential of mountain agriculture to contribute to Zero Hunger and poverty reduction. In addition, eight Asian country case studies not only identify context specific challenges within biophysical, technical, policy, socio-economic and institutional dimensions.
