Politics and the Sciences of Culture in Germany, 1840-1920 Woodruff D. Smith, 1991 Examining the ways in which politics and ideology stimulate and shape changes in human science this book focuses on the cultural sciences in nineteenth and early twentieth century Germany The book argues that many of the most important theoretical directions in German cultural science had their origins in a process by which a general pattern of social scientific thinking one that was closely connected to political liberalism and dominant in Germany and elsewhere before the mid nineteenth century fragmented in the face of the political troubles of German liberalism after that time Some liberal social scientists who wanted to repair both liberalism and the liberal theoretical pattern and others who wanted to replace them with something more conservative turned to the concept of culture as the focus of their intellectual endeavors Later generations of intellectuals repeated the process motivated in large part by the experiences of liberalism as a political movement in the German Empire Within this framework the book discusses the formation of diffusionism in German anthropology Friedrich Ratzel's theory of Lebensraum folk psychology historical economics and cultural history It also relates these developments to German imperialism the rise of radical nationalism and the upheaval in German social science at the turn of the century

Political Repression in 19th Century Europe Robert Justin Goldstein, 2013-06-17 Originally published in 1983 The nineteenth century was a time of great economic social and political change As Europe modernized previously ignorant and apathetic elements in the population began to demand political freedoms There was pressure also for a freer press for the rights of assembly and association The apprehension of the existing elites manifested itself in an intensification of often brutal form of political repression The first part of this book summarizes on a pan European basis the major techniques of repression such as the denial of popular franchise and press censorship This is followed by a chronological survey of these techniques from 1815 1914 in each European country The book analyzes the long and short term importance of these events for European historical development in the 19th and 20th centuries

Private Lives and Collective Destinies

Benedict Schofield, 2012 Nineteenth century Germany witnessed many debates on the nature of the nation both before and after unification in 1871 Bourgeois authors engaged closely with questions of class and national identity and resourcefully sought to influence the collective destiny of the German people through works of popular fiction and cultural history Typical of this trend was the realist writer Gustav Freytag 1816 1895 the most widely read novelist of his era Innovatively exploring all of Freytag's works poetry drama novels history journalism biography and literary theory Schofield examines how his popular writing systematically reimagined the social structures of German society embedding political agendas within contemporary stories of private lives Connecting the aesthetics of Realism with the political aims of the bourgeoisie the study both reassesses Freytag's position within the German literary canon and re-evaluates received opinion on the socio-political function of Realism in German culture Benedict Schofield is Lecturer in German at King's College London

Latin America In The World Economy Frederick Stirton Weaver, 2018-02-13 Latin America in the World Economy considers the dual aspect of Latin American development how external factors phases of world capitalism since Columbus interweave with internal factors Latin American culture politics and social groups Weaver skillfully demonstrates how domestic social conflicts and power relations have consistently capitalized on changes in the international economy while conversely engagement with the international economy has consistently constrained local struggles and patterns of change Over half of Latin America in the World Economy focuses on the short twentieth century after 1930 and the way that the book frames recent events and processes in broad historical and comparative terms is appropriate for courses on world history and comparative development as well as for more specialized courses on Latin America

Dennison, 2008 During his early life 1884-1925 Rudolf Bultmann passionately attempted to unite scholar and laity through his understanding of God which developed in the context of his home and its love for the common people of the church the legacy of Schleiermacher Marburg Lutheran neo Kantianism the eschatological perspective of the History of Religion School dialectical theology and Heidegger's philosophy of existence Bultmann always insisted that God reflected the inner forces of life within each human being Over the years however Bultmann came to hold that Lutheran neo Kantianism provided the basic structure by which to analyze critique and strengthen his understanding of God In light of this neo Kantian structure Bultmann insisted that God could not be the formulation of any scientific ethical or artistic construction In other words God could not be the object or manifestation of human reason in any form since God transcended human reason Hence in 1925 through the assistance of the dialectical theologians and Heidegger Bultmann presented his purest formulation of a neo Kantian understanding of God God as the spontaneous moment of encountering the dialectical forces within our existential being

Making Sense of Marx Jon Elster, 1985-05-09 A critical examination of the social theories of Karl Marx

A Companion to Nazi Germany Shelley Baranowski, Armin Nolzen, Claus-Christian W. Szejnmann, 2018-04-03 A Deep Exploration of the Rise, Reign and Legacy of the Third Reich For its brief existence National Socialist Germany was one of the most destructive regimes in the history of humankind Since that time scholarly debate about its causes has volleyed continuously between the effects of political and military decisions pathological development or modernity gone awry Was terror the defining force of rule or was popular consent critical to sustaining the movement Were the German people sympathetic to Nazi ideology or were they radicalized by social manipulation and powerful propaganda Was the Final Solution the motivation for the Third Reich's rise to power or simply the outcome A Companion to Nazi Germany addresses these crucial questions with historical insight from the Nazi Party's emergence in the 1920s through its postwar repercussions From the theory and context that gave rise to the movement through its structural cultural economic and social impacts to the era's lasting legacy this book offers an in depth examination of modern history's most infamous reign Assesses the historiography of Nazism and the prehistory of the regime Provides deep insight into labor education research and home life amidst the Third Reich's ideological imperatives Describes how the Third Reich affected business the economy and the culture including sports entertainment and religion Delves into the social militarization in the lead up to war and examines the social and historical complexities that allowed genocide to take place Shows how modern day Germany confronts and deals with its recent history Today's political climate highlights the critical need to understand how radical nationalist movements gain an audience then followers then power While historical analogy can be a faulty basis for analyzing current events there is no doubt that examining the parallels can lead to some important questions about the

present Exploring key motivations environments and cause and effect this book provides essential perspective as radical nationalist movements have once again reemerged in many parts of the world *International Politics of Recognition* Thomas Lindemann,Erik Ringmar,2015-11-17 The origins of international conflict are often explained by security dilemmas power rivalries or profits for political or economic elites Common to these approaches is the idea that human behaviour is mostly governed by material interests which principally involve the quest for power or wealth The authors question this truncated image of human rationality Borrowing the concept of recognition from models developed in philosophy and sociology this book provides a unique set of applications to the problems of international conflict and argues that human actions are often not motivated by a pursuit of utility maximisation as much as they are by a quest to gain recognition This unique approach will be a welcome alternative to the traditional models of international conflict *Intellectuals, Socialism, and Dissent* John C. Torpey,1995 *Intellectuals Socialism and Dissent* was first published in 1995 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions Once the Berlin Wall fell in 1989 the people of East Germany had little use for the dissident intellectuals who had helped bring it down *Intellectuals Socialism and Dissent* offers a penetrating look into the circumstances of this fall from grace unique among the former Communist states John Torpey traces the dissident intellectuals fate to the peculiar situation of the East German regime which sought to build socialism in a quarter of a country on the anti fascist foundations of Communist opposition to Nazism He shows how the regime s unusual history and subnational status helped sustain the East German intelligentsia s conviction that socialism could be reformed and humane that there was a third way between Soviet style socialism and the capitalism that took root in West Germany How the pursuit of this third way both supported and undermined the regime and both galvanized and alienated the East German people becomes clear in Torpey s nuanced analysis His book makes a powerful contribution to our understanding of the politics of intellectuals during one of the most painful chapters in modern German history John C Torpey is currently a Jean Monnet Fellow at the European University Institute in Florence
