regional rivals and by implication established a new ideological paradigm that privileged competing religious factions over secular ideals. The trend first manifested itself in Iraq during the American occupation with Iranian backed Shiites fighting Saudi supported Sunnis. A similar dynamic is evident in current regional wars in Syria and Yemen. By elevating particular groups through rhetorical financial and military support, civil conflicts in the Middle East reflect the ideologies behind the Saudi Iranian rivalry. This book therefore looks beyond popular narratives of intractable long standing Sunni Shia conflict to explain the source of current sectarian tension as a product of balance of power dynamics. It also helps to explain the fracturing of the region that created a ripe environment for groups like the Islamic State to capitalize on sectarian grievances. This book relies and builds on balance of power theorizing by looking at the way that traditional competition for power between states and nonstate actors shapes ideological competition. For example, during the Cold War the two major world powers, the U.S. and the Soviet Union, helped to shape international conflicts so that the narrative of capitalism vs communism played a prominent role in civil and international conflicts such as in Korea, Nicaragua, or Angola. By meddling in the internal affairs of states, arming rebel groups, and lending support to competing factions, the U.S. and U.S.S.R. shaped not only outcomes but also the ideas underpinning conflicts. Today a similar dynamic can be discerned in the Middle East.

Facing the Sea of Sand Barry Cunliffe, 2023 Northern Africa is dominated by the Sahara Desert stretching across the continent from the Atlantic Ocean to the Red Sea. This book is about the people who lived around the edges of the Desert and the different ways in which they responded to its challenges, establishing networks of communication across its expanse. But the Sahara has not always been a desert. From about 9000 BC the region began to enjoy a warm humid period allowing vegetation to flourish and wild animals to move in. Humans soon followed practising pastoral economies but with the onset of harsher conditions once more around 3000 BC the desert reclaimed its own. Since then fluctuations in climate have continued to affect the lives of people living around the desert fringes. The communities occupying the North African Coast and in the Nile Valley have come under the influence of the states dominating the Near East and the Mediterranean but those living in the Sahel to the south of the desert have developed their own distinctive cultures. The book tells the story of the growing links between the two worlds showing that Africa played a crucial part in the development of the Old World before it was drawn into the story of the New World.

own clothing to make symbols of the cross for crusaders as well as key events countries places and themes that shed light on everything from the propaganda that inspired crusading warriors to the ways in which they fought Special coverage of topics such as taxation pilgrimage warfare chivalry and religious orders give readers an appreciation of the multifaceted nature of these holy wars

Learning in a Crusader City Jonathan Rubin, 2018-09-06 Did the Crusades trigger significant intellectual activity To what extent and in what ways did the Latin residents of the Crusader States acquire knowledge from Muslims and Eastern Christians And how were the Crusader states influenced by the intellectual developments which characterized the West in the twelfth and thirteenth centuries This book is the first to examine these questions systematically using the complete body of evidence from one major urban centre Acre This reveals that Acre contained a significant number of people who engaged in learned activities as well as the existence of study centres housed within the city This volume also seeks to reconstruct the discourse that flowed across four major fields of learning language and translation jurisprudence the study of Islam and theological exchanges with Eastern Christians The result is an unprecedentedly rich portrait of a hitherto neglected intellectual centre on the Eastern

shores of the medieval Mediterranean **The Rhetoric of Numbers in Gibbon's History** F. P. Lock, 2012-09-28 Gibbon aspired to combine the critical analysis of the eighteenth century philosophe with the older traditions of the humanist and scholarly historian His different uses of numbers to inform and to persuade illustrate his remarkable fusion of these approaches This book the first to be devoted to a historian's use of numbers shows how carefully Gibbon interrogated and deployed the numerical evidence in his sources to create a more accurate historical narrative to demonstrate his own reliability and candor as a historian and to convince readers of the validity of his interpretations of characters and events
