Metropolitan Problems S. Miles, 2013-05-13 Metropolitan Problems is the end product of one of the most dynamic research programmes of its kind ever conceived and executed The book which took three years to complete represents the culmination of a two year study that was highlighted by a conference held in Toronto in 1967 In the early 1960s the bureau of Municipal Research in Metropolitan Toronto decided that a significant way for it to celebrate Canada's centennial would be to initiate a systematic international study of the world's metropolitan areas The study with the official cooperation of the United Nations was designed to produce positive insights into the methods of coping with the interlocking sets of problems associated with the expansion of the modern metropolis Twelve papers on various aspects of metropolitan problems were commissioned from an international body of experts Working with these experts were study groups drawn from forty major metropolitan centres throughout the world After making exhaustive studies of their respective urban centres the groups reported their findings and submitted detailed briefs through their representatives at the conference Throughout the symposium a conscious effort was made to examine single aspects of social economic and

physical change within the overall perspective of the metropolis The book reflects this approach Each chapter directs attention to specific problems of the metropolis problems resulting from the contradiction between accelerating technology and our ability to cope with the incredible pace and rate of change Together they prove that despite differences in technology culture and political and social matters the major urban areas of the world do have much in common Emerging tendencies can be analysed and corrective and preventative measures be made through comparative analysis This book was first published in 1970 *Places to Grow* Lorne Bruce,2020-04-30 The core of the book revolves around the shifting nature of

Ontario s political landscape In many ways this is a story of successive governments ambitious politicians diligent bureaucrats and endless library reports straddling the decades Their aim appears to have been making even better a system that despite weaknesses was clearly the best in Canada Three distinctive trends emerged in Ontario librarianship after the 1930s first a growing sense of professionalism in librarianship second an enhanced sense of belonging to a pan Canadian library movement that in 1946 would result in the formation of the Canadian Library Association and third a heightened awareness of the competing demands of high culture and popular culture Public libraries became an important vehicle for promoting community albeit with competing visions of space and place as Canada generally and Ontario specifically experienced post World War II immigration and the baby boom As libraries approached the 21st century the concerns of digital formats and the all encompassing Internet intertwined to alter the book centric bricks and mortar world of libraries Nonetheless public libraries were well placed to survive this new threat just as they had with the challenges of radio television and telecommunication challenges in the 20th century Planning Canadian Regions Gerald Hodge,Ira M.

Robinson,2007-10-01 *Planning Canadian Regions* is the first book to consolidate the history evolution current practice and future prospects for regional planning in Canada As planners grapple with challenges wrought by globalization the evolution of massive new city regions and the pressures of sustainable and community development a deeper understanding of Canada s approaches is invaluable Hodge and Robinson identify the conceptual and historical foundations of regional planning and propose a new planning paradigm that emphasizes regional governance and greater inclusiveness and integration of physical planning with planning for economic sustainability and natural ecosystems *Bulletin of the New York State Museum* ,1905
