Royal Year 1992:

The King's Artists : The Royal Academy of Arts and the Politics of British Culture 1760-1840 Holger Hoock, 2003-11-13 This is the story of the forging of a national cultural institution in late eighteenth and early nineteenth century Britain The Royal Academy of Arts was the dominant art school and exhibition society in London and a model for art societies across the British Isles and North America This is the first study of its early years re evaluating the Academy's significance in national cultural life and its profile in an international context Holger Hoock reassesses royal and state patronage of the arts and explores the concepts and practices of cultural patriotism and the politicization of art during the American and French Revolutions By demonstrating how the Academy shaped the notions of an English and British school of art and influenced the emergence of the British cultural state he illuminates the politics of national culture and the character of British public life in an age of war revolution and reform

Monarchy and the End of Empire Philip Murphy, 2013-12-05 This unique and meticulously researched study examines the triangular relationship between the British government the Palace and the modern Commonwealth since 1945 It has two principal areas of focus the monarch's role as sovereign of a series of Commonwealth Realms and quite separately as head of the Commonwealth It traces how in the early part of the twentieth century the British government promoted the Crown as a counterbalance to the centrifugal forces that were drawing the Empire apart Ultimately however with newly independent India's determination to become a republic in the late 1940s Britain had to accept that allegiance to the Crown could no longer be the common factor binding the Commonwealth together It therefore devised the notion of the headship of the Commonwealth as a means of enabling a republican India to continue to give the monarchy a pivotal symbolic role and therefore to remain in the Commonwealth In the years of rapid decolonization which followed 1945 it became clear that this elaborate constitutional infrastructure posed significant problems for British foreign policy The system of Commonwealth Realms was a recipe for confusion and misunderstanding Policy makers in the UK increasingly saw it as a liability in terms of Britain's relations with its former colonies so much so that by the early 1960s they actively sought to persuade African nationalist leaders to adopt republican constitutions on independence The headship of the Commonwealth also became a cause for concern partly because it offered opportunities for the monarch to act without ministerial advice and partly because it tended to tie the British government to what many within the UK had begun to regard as a largely redundant institution Philip Murphy employs a large amount of previously unpublished documentary evidence to argue that the monarchy's relationship with the Commonwealth which was initially promoted by the UK as a means of strengthening Imperial ties increasingly became an source of frustration for British foreign policy makers

Monthly Catalogue, United States Public Documents ,1995-03 *Phantasmagoria* David T Evans,2018-11-09 First published in 1999 this original and entertaining sociological study takes a comprehensive and critical view of opera as unique cultural artefact as loss making industry as institution with a museum culture and as consumed commodity of rare distinction and elaborate ritual Specific chapters deal with opera within the contexts of musicological analysis auratic art and fetishized taste opera as business and as museum singers opera producers opera and audiences opera There is also a chapter on opera popular commercialised fragments of opera outside the opera house consumed by and through all manner of reproduced means CD video Three Tenors concerts film and TV soundtracks advertising jingles etc Despite the supposed popularisation and successful commercial exploitation of opera during the past decade or so this study concludes that opera remains an art form institution and ritual of relative inaccessibility and exclusiveness The commercial interest in and profitability of opera do not translate into new popular audiences in the opera house The increased dependency of opera companies on corporate funding in the face of retreating government subsidies may have brought a new elite audience into the expensive seats pandered to by the introduction of surtitles etc but the traditional elite has succeeded in closing down entry to opera in other select venues where opera continues to confirm and maintain their select identity and prestige of their life style
