**Encyclopedia of Religion and Nature** Bron Taylor, Jeffrey Kaplan, 2005-01-01 No Marketing Blurbs

Missions and Empire Norman Etherington, 2005-07-14 The explosive expansion of Christianity in Africa and Asia during the last two centuries constitutes one of the most remarkable cultural transformations in the history of mankind Because it coincided with the spread of European economic and political hegemony it tends to be taken for granted that Christian missions went hand in hand with imperialism and colonial conquest In this book historians survey the relationship between Christian missions and the British Empire from the seventeenth century to the 1960s and treat the subject thematically rather than regionally or chronologically Many of these themes are treated at length for the first time relating the work of missions to language medicine anthropology and decolonization Other important chapters focus on the difficult relationship between missionaries and white settlers women and mission and the neglected role of the indigenous evangelists who did far more than European or North American missionaries to spread the Christian religion belying the image of Christianity as the white man's religion

**European Police Forces and Law Enforcement in the First World War** Jonas Campion, Laurent López, Guillaume Payen, 2019-11-08 This book offers a global history of civilian military and gendarmerie style policing around the First World War Whilst many aspects of the Great War have been revisited in light of the centenary and in spite of the recent growth of modern policing history the role and fate of police forces in the conflict has been largely forgotten Yet the war affected all European and extra European police forces Despite their diversity all were confronted with transnational factors and forms of disorder and suffered generally from mass conscription During the conflict societies and states were faced with a crisis situation of unprecedented magnitude with mass mechanised killing on the battle field and starvation occupation destruction and in some cases even revolution on the home front Based on a wide geographical and chronological scope from the late nineteenth century to the interwar years this collection of essays explores the policing of European belligerent countries alongside their empires and neutral countries The book's approach crosses traditional boundaries between neutral and belligerent nations centres and peripheries and frontline and rear areas It focuses on the involvement and wartime transformations of these law enforcement forces thus highlighting underlying changes in police organisation identity and practices across this period

Between Indigenous and Settler Governance Lisa Ford, Tim Rowse, 2013 This book addresses the history current development and future of indigenous self

governance in five settler colonial nations Australia Canada New Zealand South Africa and the United States      **The Oxford Handbook of Millennialism** Catherine Wessinger, 2016-07 Seventh Day Adventists Melanesian cargo cults David Koresh's Branch Davidians and the Raelian UFO religion would seem to have little in common What these groups share however is a millennial orientation the audacious human hope for a collective salvation which may be either heavenly or earthly The Oxford Handbook of Millennialism offers readers an in depth look at both the theoretical underpinnings of the study of millennialism and its many manifestations across history and cultures      **Regional, Critical, and Historical Approaches** Peter Antes, Armin W. Geertz, Randi R. Warne, 2008-12-19 Internationally recognized scholars from many parts of the world provide a critical survey of recent developments and achievements in the global field of religious studies The work follows in the footsteps of two former publications Classical Approaches to the Study of Religion edited by Jacques Waardenburg 1973 and Contemporary Approaches to the Study of Religion edited by Frank Whaling 1984 85 New Approaches to the Study of Religion completes the survey of the comparative study of religion in the twentieth century by focussing on the past two decades Many of the chapters however are also pathbreaking and point the way to future approaches
