scholarship Marling makes new connections between events of the 1920s and 1930s and the modes styles and genres of their representation At the center of Marling s approach is the concept of prodigality how narrative represents having and having had too much Never before in the country he argues did wealth impinge on the national conscience as in the 1920s and never was such conscience so sharply rebuked as in the 1930s What asks Marling were the paradigms that explained accumulation and windfall waste and failure Marling first establishes a theoretical and historical context for the notion of prodigality Among the topics he discusses are such watershed events as the trial of Sacco and Vanzetti and the premiere of the first sound movie The Jazz Singer technology s alteration of Americans perceptive and figurative habits and the shift from synecdochical to metonymical values entailed by a consumer society Marling then considers six noir classics relating them to their authors own lives and to the milieu of prodigality that produced them and which they sought to explain Dashiell Hammett s Red Harvest and The Maltese Falcon James M Cain s The Postman Always Rings Twice and Double Indemnity and Raymond Chandler s The Big Sleep and Farewell My Lovely Reading these narratives first as novels then as films Marling shows how they employed the prodigality fabula s variations and ancillary value systems to help Americans adapt for better or worse to a society driven by economic and technological forces beyond their control *Shifting the Blame* Nan Goodman,2013-12-16 When someone gets hurt in an accident we reflexively ask a set of questions which ultimately comes down to who was blameworthy Yet early nineteenth century Americans were entirely and to the modern reader astonishingly uninterested in this line of reasoning Their concern was whether an accident had happened and not why Nan Goodman takes this transformation in legal and popular thought about the nature of accidents as a starting point for a broad inquiry into changing conceptions of individual agency and ultimately of self in industrializing America Goodman looks to both conventional historical sources and the literary depiction of accidents in the work of Mark Twain Stephen Crane Charles Chesnutt and others to explain the new ways that Americans began to make sense of the unplanned *Rethinking Art History* Donald Preziosi,1989-01-01 A general overview of the theoretical and institutional history of the discipline of art history Refuting the image of art history as a discipline in crisis Preziosi asserts that many of the dilemmas and contradictions of art history today are not new but can be traced back to problems surrounding the founding of the discipline its institutionalization and its academic expansion since the 1870s Donald Preziosi has written a timely and incisive study of the methods and assumptions of art history in the modern period As the book unfolds one realizes that art history was never as unitary and monolithic as the phrase the discipline of art history suggests but is in fact a complicated and highly contradictory range of practices whose disciplinary coherence may be more mythical than real This is a deliberately discomfiting book however for its clear sightedness rigor and wit it is a book to be welcomed by everyone concerned with the present condition and future direction of visual studies Norman Bryson Harvard University An important and courageous book Rethinking Art History is a rigorous and original contribution to the current post structuralist and postmodernist

debates in cultural studies here and abroad Steven Z Levine Bryn Mawr College Through this kind of reading of the discourse of art history Preziosi provides some acute analysis of the metaphors and stratagems which continue to discipline the discipline of art history *The Comic Art Collection Catalog* Michigan State University.
