Seminaire De Theorie Des Nombres, Paris 1988-1989 (progress In Mathematics, Vol 91) Catherine Goldstein,1990 Very Good No Highlights or Markup all pages are intact   **Séminaire de Théorie Des Nombres, Paris** ,1988   *Séminaire de théorie des nombres, Paris, 1989-90* Sinnou David,1992   *New Developments in Lie Theory and Their Applications* Juan Tirao,Wallach,2012-12-06 Representation theory and more generally Lie theory has played a very important role in many of the recent developments of mathematics and in the interaction of mathematics with physics In August September 1989 a workshop Third Workshop on Representation Theory of Lie Groups and its Applications was held in the environs of C6rdoba Argentina to present expositions of important recent developments in the field that would be accessible to graduate students and researchers in related fields This volume contains articles that are edited versions of the lectures and short courses given at the workshop Within representation theory one of the main open problems is to determine the unitary dual of a real reductive group Although this prob lem is as yet unsolved the recent work of Barbasch Vogan Arthur as well as others has shed new light on the structure of the problem The article of D Vogan presents an exposition of some aspects of this prob lem emphasizing an extension of the orbit method of Kostant Kirillov Several examples are given that explain why the orbit method should be extended and how this extension should be implemented   Analytic And Combinatorial Number Theory: The Legacy Of Ramanujan - Contributions In Honor Of Bruce C. Berndt George E Andrews,Michael Filaseta,Ae Ja Yee,2024-08-19 This volume reflects the contributions stemming from the conference Analytic and Combinatorial Number Theory The Legacy of Ramanujan which took place at the University of Illinois at Urbana Champaign on June 6 9 2019 The conference included 26 plenary talks 71 contributed talks and 170 participants As was the case for the conference this book is in honor of Bruce C Berndt and in celebration of his mathematics and his 80th birthday Along with a number of papers previously appearing in Special Issues of the International Journal of Number Theory the book collects together a few more papers a biography of Bruce by Atul Dixit and Ae Ja Yee a preface by George Andrews a gallery of photos from the conference a number of speeches from the conference banquet the conference poster a list of Bruce s publications at the time this volume was created and a list of the talks from the conference   **Séminaire de Théorie des Nombres, Paris 1987-88** Goldstein,2012-12-06   *Representation Theory of Finite Groups and Finite-Dimensional Algebras* Michler,Ringel,2012-12-06 From April 1 1984 until March 31 1991 the Deutsche Forschungsgemeinschaft has sponsored the project Representation Theory of Finite Groups and Finite Di mensional Algebras The proposal for this project was submitted by B Huppert Mainz B Fischer Bielefeld G Michler Essen H Pahlings Aachen and C M Ringel Bielefeld in order to strengthen the interaction between the different re search areas in representation theory The Deutsche Forschungsgemeinschaft has given many research positions and fellowships for young algebraists enabling them to do research at their own uni versities or as visitors at well known research institutions in America Australia England and France The whole project benefitted very

much from an extensive exchange programme between German and American scientists sponsored by the Deutsche Forschungsgemeinschaft and by the National Science Foundation of the United States This volume presents lectures given in a final conference and reports by members of the project It is divided into two parts The first part contains seven survey articles describing recent advances in different areas of representation theory These articles do not only concentrate on the work done by the German research groups but also inform on major developments of the subject at all The volume omits those topics already treated in book form In particular it does not contain a survey on K   Effective Methods in Algebraic Geometry T. Mora,C. Traverso,2012-12-06 The symposium MEGA 90 Effective Methods in Algebraic Geome try was held in Castiglioncello Livorno Italy in April 17 211990 The themes we quote from the Call for papers were the fol lowing Effective methods and complexity issues in commutative algebra pro jective geometry real geometry algebraic number theory Algebraic geometric methods in algebraic computing Contributions in related fields computational aspects of group theory differential algebra and geometry algebraic and differential topology etc were also welcome The origin and the motivation of such a meeting that is supposed to be the first of a series deserves to be explained The subject the theory and the practice of computation in alge braic geometry and related domains from the mathematical viewpoin has been one of the themes of the symposia organized by SIGSAM the Special Interest Group for Symbolic and Algebraic Manipulation of the Association for Computing Machinery SAME Symbolic and Algebraic Manipulation in Europe and AAECC the semantics of the name is vary ing an average meaning is Applied Algebra and Error Correcting Codes   **Geometry and Spectra of Compact Riemann Surfaces** Peter Buser,2010-10-29 This monograph is a self contained introduction to the geometry of Riemann Surfaces of constant curvature 1 and their length and eigenvalue spectra It focuses on two subjects the geometric theory of compact Riemann surfaces of genus greater than one and the relationship of the Laplace operator with the geometry of such surfaces Research workers and graduate students interested in compact Riemann surfaces will find here a number of useful tools and insights to apply to their investigations   Loop Spaces, Characteristic Classes and Geometric Quantization Jean-Luc Brylinski,2009-12-30 This book examines the differential geometry of manifolds loop spaces line bundles and groupoids and the relations of this geometry to mathematical physics Applications presented in the book involve anomaly line bundles on loop spaces and anomaly functionals central extensions of loop groups K hler geometry of the space of knots and Cheeger Chern Simons secondary characteristics classes It also covers the Dirac monopole and Dirac s quantization of the electrical charge   Number Theory Hans P. Schlickewei,Eduard Wirsing,2006-11-14 The 15 papers of this selection of contributions to the Journ es Arithm tiques 1987 include both survey articles and original research papers and represent a cross section of topics such as Abelian varieties algebraic integers arithmetic algebraic geometry additive number theory computational number theory exponential sums modular forms transcendence and Diophantine approximation uniform distribution

Bokut',A. I. Kostrikin,1992   <u>Harmonic Analysis on Reductive Groups</u> W. Barker,P. Sally,2012-12-06 A conference on Harmonic Analysis on Reductive Groups was held at Bowdoin College in Brunswick Maine from July 31 to August 11 1989 The stated goal of the conference was to explore recent advances in harmonic analysis on both real and p adic groups It was the first conference since the AMS Summer Sym posium on Harmonic Analysis on Homogeneous Spaces held at Williamstown Massachusetts in 1972 to cover local harmonic analysis on reductive groups in such detail and to such an extent While the Williamstown conference was longer three weeks and somewhat broader nilpotent groups solvable groups as well as semisimple and reductive groups the structure and timeliness of the two meetings was remarkably similar The program of the Bowdoin Conference consisted of two parts First there were six major lecture series each consisting of several talks addressing those topics in harmonic analysis on real and p adic groups which were the focus of intensive research during the previous decade These lectures began at an introductory level and advanced to the current state of research Sec ond there was a series of single lectures in which the speakers presented an overview of their latest research

Radon Integrals B. Anger,C. Portenier,2012-12-06 In topological measure theory Radon measures are the most important objects In the context of locally compact spaces there are two equivalent canonical definitions As a set function a Radon measure is an inner compact regular Borel measure finite on compact sets As a functional it is simply a positive linear form defined on the vector lattice of continuous real valued functions with compact support During the last few decades in particular because of the developments of modem probability theory and mathematical physics attention has been focussed on measures on general topological spaces which are no longer locally compact e g spaces of continuous functions or Schwartz distributions For a Radon measure on an arbitrary Hausdorff space essentially three equivalent definitions have been proposed As a set function it was defined by L Schwartz as an inner compact regular Borel measure which is locally bounded G Choquet considered it as a strongly additive right continuous content on the lattice of compact subsets Following P A Meyer N Bourbaki defined a Radon measure as a locally uniformly bounded family of compatible positive linear forms each defined on the vector lattice of continuous functions on some compact subset   **First European Congress of Mathematics Paris, July 6–10, 1992** Anthony Joseph,Fulbert Mignot,Francois Murat,Bernard Prum,Rudolf Rentschler,1994-07 Table of Contents D Duffie Martingales Arbitrage and Portfolio Choice J Fr hlich Mathematical Aspects of the Quantum Hall Effect M Giaquinta Analytic and Geometric Aspects of Variational Problems for Vector Valued Mappings U Hamenst dt Harmonic Measures for Leafwise Elliptic Operators Along Foliations M Kontsevich Feynman Diagrams and Low Dimensional Topology S B Kuksin KAM Theory for Partial Differential Equations M Laczkovich Paradoxical Decompositions A Survey of Recent Results J F Le Gall A Path Valued Markov Process and its Connections with Partial Differential Equations I Madsen The Cyclotomic Trace in Algebraic K Theory A S Merkurjev Algebraic K Theory and Galois Cohomology J Nekov r Values of L Functions and p Adic Cohomology Y A Neretin Mantles Trains and Representations of Infinite Dimensional
