The New Avant-garde in Italy John Picchione, 2004-01-01 The debate on literature and the arts provoked by the Italian neoavant garde neoavanguardia is undoubtedly one of the most animated and controversial the country has witnessed from World War II to the present Comprising the period between the late 1950s and the late 1960s the phenomenon of the neoavanguardia involved key writers critics and artists both as insiders Sanguineti Balestrini Guglielmi Eco and others and adversaries such as Pasolini Calvino and Moravia In The New Avant Garde in Italy the first book in English to document the movement John Picchione's objective is twofold to provide a comprehensive analysis of the theoretical tenets that inform the works of the neoavanguardia and to show how they are applied to the poetic practices of its authors The neoavanguardia cannot Picchione argues be defined as a movement with a unified program expressed in the form of manifestos or shared theoretical principles It experiences irreconcilable internal conflicts that are explored as a split between two main blocs one that is tied to the project of modernity the other to post modern aesthetic postures This study suggests that some of the contentious views proposed by the neoavanguardia anticipated a wide range of issues that continue to be significant and

The Semiotic Sphere Thomas A. Sebeok, Jean Umiker-Sebeok, 2012-12-06

Although semiotics has in one guise or another flourished uninterruptedly since pre Socratic times in the West and important semiotic themes have emerged and developed independently in both the Brahmanic and Buddhist traditions semiotics as an organized undertaking began to bloom only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much of Europe Eastern and Western and in North America Thereafter others quickly surfaced almost everywhere over the literate globe Different places strategically allied themselves with different legacies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems their comparative analysis and their classification More or less permanent confederations were forged with the most diverse academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward Bit by bit mutually supportive international networks were put together Today it can truly be asserted that semiotics has become a global enterprise This of course is far from saying that the map is uniform or even that world wide homogeneity is in the least desirable While our conjoint ultimate goal remains steadily in focus the multiplicity of avenues available for its realization is inherent in the adventure of the search itself

Ecosistemi letterari Nicola Turi, 2016

What does the growing interest of literary criticism towards the representation of nature and its ethical implications tell us In which folds of narrative poetic or cinematographic discourse do the manifestations of a continuously renewed sensitivity for the contradictions of progress for the precarious coexistence between human animal and plant agents lie And what kind of relationships can there be between the semantics of places and landscapes expressed in a fictional world and eco criticism Sixteen essays suspended between text analysis and theory of criticism are solicited and collected by Nicola Turi in an attempt to answer these and other questions affecting the function and orientations of contemporary criticism its ability to give back the forms of artistic language and at the same time its recurring temptation to confront as Calvino's Bradamante would say with the life behind it that pushes and disarranges all the leaves of the book
