Housing the Poor in the Developing World Graham Tipple,Kenneth G. Tipple,2003-10-04 First Published in 2004 Housing policies and programmes tend to result from political expediency rather than a rational and informed analysis of the situation and the demands of individual households for housing Housing the Poor in the Developing World aims to show how methods of analysis can be used to improve efficacy and equity in housing projects and policies with analysis designed for local circumstances This book is aimed at satisfying the need to bring together methods of analysis from several disciplines which can be applied to housing Each method is presented and illustrated with a case study to show how it can be used to inform housing policy in a wide range of countries in all parts of the developing world

The Encyclopedia of Public Choice Charles Rowley,Friedrich Schneider,2008-01-25 The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice However the title would not convey sufficiently the breadth of the Encyclopedia's contents which can be summarized better as the fruitful interchange of economics political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume Adam Ferguson and Adam Smith contributed to all these fields and more However as intellectual specialization gradually replaced broad based scholarship from the mid nineteenth century onwards it became increasingly rare to find a scholar making major contributions to more than one Once Alfred Marshall defined economics in neoclassical terms as a narrow positive discipline the link between economics political science and moral philosophy was all but severed and economists redefined their role into that of the humble dentist providing technical economic information as inputs to improve the performance of impartial benevolent and omniscient governments in their attempts to promote the public interest This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War
