[Enlightened Animals in Eighteenth-Century Art](#) Sarah Cohen,2021-02-11 How do our senses help us to understand the world This question which preoccupied Enlightenment thinkers also emerged as a key theme in depictions of animals in eighteenth century art This book examines the ways in which painters such as Chardin as well as sculptors porcelain modelers and other decorative designers portrayed animals as sensing subjects who physically confirmed the value of material experience The sensual style known today as the Rococo encouraged the proliferation of animals as exemplars of empirical inquiry ranging from the popular subject of the monkey artist to the alchemical wonders of the life sized porcelain animals created for the Saxon court Examining writings on sensory knowledge by La Mettrie Condillac Diderot and other philosophers side by side with depictions of the animal in art Cohen argues that artists promoted the animal as a sensory subject while also validating the material basis of their own professional practice
