MacQueen, 2023-10-20 This book explores the rise of a Scottish common law from the twelfth century on despite the absence until around 1500 of a secular legal profession Key stimuli were the activity of church courts and canon lawyers in Scotland coupled with the example provided by neighbouring England's common law The laity's legal consciousness arose from exposure to law by way of constant participation in legal processes in court and daily transactions This experience enabled some to become judges pleaders in court and transactional lawyers and lay the foundations for an emergent professional group by the end of the medieval period **Medieval Scotland** Alexander Grant, 2019-07-30 No detailed description available for Medieval Scotland Scottish Orientalists and India Avril Ann Powell, 2010 Structured around the lives and careers of two Scottish scholar administrator brothers Sir William and Dr John Muir who served in the East India Company and the Raj in North West India from 1827 1876 this book examines cultural especially religious and educational attitudes and interactions during the period The core of the study centres on a detailed examination of the brothers seminal works on Vedic and Islamic history and society which researched from Sanskrit and Arabic sources became standard reference works on India's religions during the Raj The publication of these works coincided with the outbreak of the Indian Uprising of 1857 on the nature of which William's correspondence with his brother and others allows some reconsideration especially in respect of Muslim participation Powell also examines the response of Indian Muslim scholars particularly of Sir Saiyid Ahmad Khan to William's critiques of Islam and the brothers patronage of Oriental scholarship comparative religion and education during their long retirement back in their native Scotland The study contributes to current debates about the Scottish contribution to Empire with particular reference to India and to cultural issues *Robert Burns and Pastoral* Nigel Leask, 2010-07-02 Robert Burns and Pastoral is a full scale reassessment of the writings of Robert Burns 1759 1796 arguably the most original poet writing in the British Isles between Pope and Blake and the creator of the first modern vernacular style in British poetry Although still celebrated as Scotland's national poet Burns has long been marginalised in English literary studies worldwide due to a mistaken view that his poetry is linguistically incomprehensible and of interest to Scottish readers only Nigel Leask challenges this view by interpreting Burns's poetry as an innovative and critical engagement with the experience of rural modernity namely to the revolutionary transformation of Scottish agriculture and society in the decades between 1760 and 1800 thereby resituating it within the mainstream of the Scottish and European enlightenments Detailed study of the literary social and historical contexts of Burns's poetry explodes the myth of the Heaven taught ploughman revealing his poetic artfulness and critical acumen as a social observer as well as his significance as a Romantic precursor Leask discusses Burns's radical decision to write Scots pastoral rather than English georgic poetry in the tradition

of Allan Ramsay and Robert Fergusson focusing on themes of Scottish and British identity agricultural improvement poetic self fashioning language politics religion patronage poverty antiquarianism and the animal world The book offers fresh interpretations of all Burns's major poems and some of the songs the first to do so since Thomas Crawford's landmark study of 1960 It concludes with a new assessment of his importance for British Romanticism and to a Four Nations understanding of Scottish literature and culture Virtue, Learning and the Scottish Enlightenment David Allan,2020-03-31 No detailed

description available for Virtue Learning and the Scottish Enlightenment **From an Antique Land** Anne MacLeod,2012-11-05 This book looks at visual images as an alternative and undervalued source of evidence for ideas about the Scottish Gàidhealtachd in the period 1700-1880 Illustrated with 100 plates it brings together many little known and previously unrelated images Addressing the textual bias inherent in Scottish historical studies the book examines a broad range of maps plans paintings drawings sketches and printed images arguing that the concept of antiquity was the single most powerful influence driving the visual representation of the Highlands and Islands from 1700 to 1880 and indeed beyond Successive chapters look at archaeological ethnological and geological motives for visualising the Highlands and at the bias in favour of antiquity which resulted from the spread of these intellectual influences into the fine arts The book concludes that the shadow of time which hallmarked visual representations of the region resulted in a preservationist mentality which has had powerful repercussions for approaches to Highland issues down to the present day The book will appeal to historians art historians cultural geographers and the general reader interested in Highland history and culture **The Burns Supper**
