ancient smells both enticing and repugnant in the visual and performative arts from the late 18th century up to the 21st century The individual contributions explore painting sculpture literature and film but also theatrical performance museum exhibitions advertising television series historical reenactment and graphic novels which have all played a part in reshaping modern audiences perceptions and experiences of the antique

The Development of the Concept of SMELL in American English Daniela Pettersson-Traba,2022-10-24 The last decades have witnessed a renewed interest in near synonymy In particular recent distributional corpus based approaches used for semantic analysis have successfully uncovered subtle distinctions in meaning between near synonyms However most studies have dealt with the semantic structure of sets of near synonyms from a synchronic perspective while their diachronic evolution generally has been neglected Against this backdrop the aim of this book is to examine five adjectival near synonyms in the history of American English from the understudied semantic domain of SMELL fragrant perfumed scented sweet scented and sweet smelling Their distribution is analyzed across a wide range of contexts including semantic morphosyntactic and stylistic ones since distributional patterns of this type serve as a proxy for semantic dis similarity The data is submitted to various univariate and multivariate statistical techniques making it possible to uncover fine grained dis similarities among the near synonyms as well as possible changes in their prototypical structures The book sheds valuable light on the diachronic development of lexical near synonyms a dimension that has up to now been relatively disregarded

Chemistry and the Sense of Smell Charles S. Sell, 2014-03-26 I cannot recommend this fascinating book highly enough. Simon Cotton, Chemistry Industry, September 2014. In conclusion, a comprehensive introduction to the world of odours not only for chemists. Review in German: Monika Paduch, *Gefahrstoffe Reinhaltung Luft* October 2014. A comprehensive overview of fragrance chemistry. Fragrance materials are universal, from personal care products to household cleaners, laundry products and more. Although many of the scents themselves are synthesized in a lab, the actual mechanism of odour has long baffled chemists who attempt to model it for research. In *Chemistry and the Sense of Smell*, industry chemist Charles S. Sell explores the chemistry and biology surrounding the human detection and processing of odour, providing a comprehensive single-volume guide to the totality of fragrance chemistry. The correlation between molecular structure and odour is much more complex than initially thought, and the intricacies of the mechanism by which the brain interprets scent signals leaves much to be discovered. This book provides a solid foundation of fragrance chemistry and highlights the relationship between research and industry with topics such as: The analysis and characterization of odour; The role scent plays in our lives; The design and manufacture of new fragrance ingredients; The relationship between molecular structure and odour; The mechanism of olfaction; Intellectual challenges and the future of the field. Complete with illustrations that clarify difficult concepts and the structures of the molecules under discussion, *Chemistry and the Sense of Smell* is an all-inclusive guide to the science of scent. For professionals in the fragrance industry or related fields, this book is one resource that should not be overlooked.

The Sunuwar of Nepal and their Sense of Communication Werner M. Egli, 2014. This detailed study on the Sunuwar people, one of the many indigenous peoples of Nepal, is based on more than twenty years of ethnographic research. The book starts with an account of the Sunuwar's indigenous notion of culture, *mukdum*, as expressed in social practice. With reference to specific social fields, a model of the Sunuwar person, mainly used to grasp deviations from the ideal way of life, is analyzed from the perspective of cultural psychology and the anthropology of the senses. The study concludes with an analysis of healing rituals, showing that their effect simultaneously results from the ancestral atmosphere produced by the shaman and a kind of domination-free discussion among the ritual participants, mainly taking place in the pauses of the ritual. Thus, the shamanic ritual is interpreted as a kind of mediation. Series: LIT Studies on Asia, *Asien Forschung und Wissenschaft*, Vol. 6. Subject: Asian Studies, Anthropology, Cultural Studies, Psychology, Religious Studies.

Smell in Eighteenth-Century England William Tullett,2019-08-13 In England from the 1670s to the 1820s a transformation took place in how smell and the senses were viewed The role of smell in developing medical and scientific knowledge came under intense scrutiny and the equation of smell with disease was actively questioned Yet a new interest in smell s emotive and idiosyncratic dimensions offered odour a new power in the sociable spaces of eighteenth century England Using a wide range of sources from diaries letters and sanitary records to satirical prints consumer objects and magazines William Tullett traces how individuals and communities perceived the smells around them from paint and perfume to onions and farts In doing so the study challenges a popular influential and often cited narrative Smell in Eighteenth Century England is not a tale of the medicalization and deodorization of English olfactory culture Instead Tullett demonstrates that it was a new recognition of smell s asocial sociability and its capacity to create atmospheres of uncomfortable intimacy that transformed the relationship between the senses and society *My Amazing Sense of Smell* Ruth Owen,2014-01-01 From taking a close up look at the parts of a nose to learning how our noses work as a team with our brain My Amazing Sense of Smell explores everything to do with how we smell What exactly is a smell made of How do we recognize smells And what exactly is snot all about These questions and many more will be answered in this lively fact packed new book for young readers Lectures on the Scientific Evidences of Natural and Revealed Religion William Clark Larrabee,1853
