The Californian Charles Frederick Holder, 1893 *Emerging Infectious Diseases*, 2008 History of Milwaukee, City and County William George Bruce, 1922 *The Columbia River Flood Basalt Province* Stephen P. Reidel, Victor E. Camp, Martin E. Ross, John A. Wolff, Barton S. Martin, Terry L. Tolan, Ray E. Wells, 2013-09-13 The Miocene Columbia River flood basalt province covers 210,000 km² of the Pacific Northwest of the United States and forms part of a larger volcanic region that also includes contemporaneous silicic centers in northern Nevada, the basaltic and time transgressive rhyolitic volcanic fields of the Snake River Plain and Yellowstone plateau and the High Lava Plains of central Oregon. The Columbia River flood basalt province is accessible and well exposed, making it one of the best studied flood basalt provinces worldwide and it serves as a model for understanding the stratigraphic development and petrogenesis of large igneous provinces through time. This volume details our current knowledge of the stratigraphy and physical volcanology, extent, volume, and age of the lava flows, the tectonic setting and history of the province, the petrogenesis of the lavas, and hydrogeology of the basalt aquifers.

Ceramics and Globalization Neil Ewins, 2017-05-04 Neil Ewins' study of the Staffordshire potteries in a period of great global change traces how ceramics production has been affected by globalisation in both familiar and unexpected ways. Although many manufacturers such as Wedgwood initially moved production to cheaper labour markets in East Asia, others remained in or returned to England once it became clear that outsourcing manufacturing was affecting the brand value and customer perception of their products. Neil Ewins explores the complex behaviour of the UK ceramics industry using a combination of evidence from the press, trade journals, ceramic objects, and primary interview evidence of manufacturers, retailers, and a ceramic designer. Ewins suggests that although the surface designs of UK ceramics invariably reflect diverse cultural and stylistic influences, a notion of authenticity often still resides in the place and context in which the ceramic product was originally made. Overall, the book argues that UK ceramics remain culturally complex because of issues of supply and demand and ties to heritage, imagined or otherwise. Within a context of globalization, the book highlights compelling issues which have huge ramifications on UK manufacturing futures.
