**The Points of Light Movement** ,1993      Humanities for the Environment Joni Adamson,Michael Davis,2016-11-10 Humanities for the Environment or HfE is an ambitious project that from 2013 2015 was funded by a generous grant from the Andrew W Mellon Foundation The project networked universities and researchers internationally through a system of observatories This book collects the work of contributors networked through the North American Asia Pacific and Australia Pacific observatories Humanities for the Environment showcases how humanists are working to integrate knowledges from diverse cultures and ontologies and pilot new constellations of practice that are moving beyond traditional contemplative or reflective outcomes the book the essay towards solutions to the greatest social and environmental challenges of our time With the still controversial concept of the Anthropocene as a starting point for a widening conversation contributors range across geographies ecosystems climates and weather regimes moving from icy melting Arctic landscapes to the bleaching Australian Great Barrier Reef and from an urban pedagogical laboratory in Phoenix Arizona to Vatican City in Rome Chapters explore the ways in which humanists in collaboration with communities and disciplines across academia are responding to warming oceans disappearing islands collapsing fisheries evaporating reservoirs of water exploding bushfires and spreading radioactive contamination This interdisciplinary work will be of great interest to scholars in the humanities social sciences and sciences interested in interdisciplinary questions of environment and culture      Wild Games Dennis Ray Cutchins,Eric Alden Eliason,2009 Humans understand at least some of what it means to be human both literally and figuratively in reference to wild animals Our relationships with wildlife have traditionally been expressed in terms of hunting more recently these relationships have also been manifest as efforts to prevent hunting Hunting and fishing traditions are in fact under fire by critics at the same time that they are receding of their own accord perhaps becoming even more endangered than any of the pursued animals These traditions form the major focus of Wild Games a new collection of essays that looks at the folklore

and culture of various hunting and fishing practices documenting the central importance of hunting to many rural societies even in modern times Editors Dennis Cutchins and Eric Eliason contend that hunters often don't perceive of themselves as separate from the wild but rather identify strongly with a natural order integrated with rather than standing apart from the fluctuation of ecosystems And they frequently don't see wild animals as set apart but understand them as food sources competitors friendly rivals and even equals Featuring contributions from a variety of distinguished scholars and writers including an essay by the noted folklorist Simon Bronner on the culture of the deer camp a fascinating account of coyote tracking by Eric Eliason and an examination of the role of gender in outdoor life by Diane Humphrey Lueck this book shows how the traditions of hunting and fishing tend to bind hunter and prey into ancient patterns that often defy contemporary culture Book Jacket      Generational Consciousness, Narrative, and Politics June Edmunds, Bryan S.
