with Sánchez's friends, family and comrades in the rebel army along with countless letters and documents. Biographer Nancy Stout was initially barred from the official archives but in a remarkable twist was granted access by Fidel Castro himself, impressed as he was with Stout's project and aware that Sánchez deserved a worthy biography. This is the extraordinary story of an extraordinary woman who exemplified the very best values of the Cuban Revolution: selfless dedication to the people, courage in the face of grave danger and the desire to transform society. *Compounding in Modern Greek* Angela Ralli, 2012-10-29

One of the core challenges in linguistics is elucidating compounds: their formation as well as the reasons their structure varies between languages. This book on Modern Greek rises to the challenge with a meticulous treatment of its diverse intricate compounds: a study as grounded in theory as it is rich in data. Enhancing our knowledge of compounding and word formation in general, its exceptional scope is a worthy model for linguists, particularly morphologists, and offers insights for students of syntax, phonology, dialectology and typology among others. The author examines first-tier themes such as the order and relations of constituents, headedness, exocentricity and theta role saturation. She shows how Modern Greek compounding relates to derivation and inflection and charts the boundaries between compounds and phrases. Exploring dialectically variant compounds and identifying historical changes, the analysis extends to similarly formed compounds in wholly unrelated languages. **New Approaches to Ancient Material Culture in the Greek & Roman World** Catherine Cooper, 2020-11-16

New Approaches to Ancient Material Culture in the Greek Roman World is about Classical Archaeology at its broadest and is important reading to all Classicists. As part of a recent movement to highlight the rich diversity of the subject, it overcomes traditional disciplinary boundaries to show the variety of current approaches to the study of Classical Antiquity from the Late Bronze Age to the Late Antique period. The multi-disciplinary papers deal with archaeology and art history, museum objects and fieldwork data, ancient texts and material culture, archaeological theory and historiography and technical and literary analysis. The international contributors discuss a selection of methodologies currently used to study ancient material and illustrate their relevance through case studies which span the Greek and Roman world. The Classical Tradition in Portuguese and Brazilian Poetry Maria de Fátima Silva, Lorna Hardwick, Susana Marques Pereira, 2022-02-21

This book includes 21 chapters dedicated to the study of contemporary Portuguese and Brazilian poets influenced by the Greco-Roman tradition. It integrates the international bibliography on reception studies in an Ibero-American context. However, the comparison between poets from the two countries highlights the cultural community that, despite the differences, unites them. Travels, routes and adventures taken in a linear or symbolic sense are the common trace of all contributions. The variety of tastes, the greater or smaller closeness to the ancient models and the authors' preferences contribute to an overall view of the classical imprint on contemporary poetry as a specific area of literature.
