Semi-Presidentialism Robert Elgie,2011-08-25 This book examines the relationship between semi presidentialism and democratic performance Semi presidentialism where a constitution provides for both a directly elected president and a prime minister and cabinet responsible to the legislature has become the regime type of choice for new democracies There are now over 50 countries in the world with a semi presidential constitution and the vast majority of these countries have chosen this form of government since the early 1990s This book operationalises Shugart and Carey s distinction between president parliamentarism where the prime minister is responsible to both the legislature and to the directly elected president and premier presidentialism where the prime minister is responsible to the legislature alone The book shows that all else equal the president parliamentary sub type is more likely to be associated with a poorer democratic performance than its premier presidential counterpart The evidence is based on a mixed method approach including large n comparative statistical studies of all semi presidential democracies since 1919 as well as in depth case studies Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.essex.ac.uk/ecpr
