Services And Resources For Children And Young Adults And Public Libraries:

Services and Resources for Children and Young Adults in Public Libraries Sheila Heaviside, 1995 the findings are presented of 1994 surveys on services and resources for children and young adults ages 12-18 in public libraries. Each survey was conducted with a different nationally representative sample of public libraries. Data was collected for individual buildings rather than for library systems. Findings indicate the following: 1. children and young adults represent 60% of public library patronage; 2. 30% of public librarians specialize in youth services; 3. 39% of libraries employ a children's librarian, 11% have a young adult librarian, and 24% have a youth services specialist on staff; 4. 30% of all public libraries have only one librarian on staff; 5. ethnic diversity of children and young adult patrons has increased over 40% in the last 5 years; 6. computer technologies are among the most heavily used children's and young adult resources in public libraries and are also the most scarce; 7. many library programs primarily target preschool and kindergarten children; 8. only 76% of public libraries report working with schools; 9. only one in seven libraries offer homework assistance programs; 10. 11% of public libraries have neither a young adult collection or section; and 11. insufficient library staff is a leading barrier to increasing services and resources for children and young adults. Survey data is provided in 21 tables and 14 figures. Appendices present survey methodology and data reliability, a list of tables with standard errors, and survey forms. AEF

In George Bobinski's sixty-year career as a library professional, 1945-2005, libraries underwent massive changes and epochal advancements. In this important work, Bobinski summarizes the major trends and events that have transformed the library world and the profession of librarianship into what it is today. *Libraries and Librarianship* begins with a historical review of the core of librarianship, focusing on the information formats available in or through libraries, the organization of library information sources, changes in reference service, trends in library management, and the all-embracing impact of technology on libraries. Bobinski also addresses library types and the growth of library cooperation and resource sharing, the spread of collaboration through library systems, consortia, and networks, federal funding, library philanthropy, and the important role of the Council on Library and Information Resources since its establishment in 1956, the growth and activities of professional library associations, the shifting roles of gender and ethnicity, and the changes in library buildings. Furthermore, a list of eminent individuals who had the greatest impact on the field during this period and influenced the dramatic changes that have taken place in library and information science education is included. Concluding with a discussion of the major developments in the field and providing a look into what the future might hold for libraries, this book will be embraced by library students, practitioners, and
