Figuring Death in Classical Athens Emily Clifford, 2025-02-12 Figuring Death in Classical Athens puts art and literature in conversation to explore how ancient Athenians grappled with the uncertainties of death How did objects and texts generate thinking about what death is and might be like Were Athenians aware of the imaginative frameworks that underpinned their thinking Did they worry not just about death but whether they could figure it out Death in the ancient

world has long been a subject of interest. Studies abound that examine its social and ideological dimensions, funerary practices and changing attitudes and beliefs. This book takes a fresh approach, cutting across sub-disciplines: art, text, philosophy, and so on, to build a picture of how ancient art and literature got their audiences thinking, thinking not just about death but about its knowability. Whether in the theatre at the symposium or on the Acropolis, representations of death challenged Athenians by presenting problems of exteriority: how can the living know what dying might be like, and particularity can one person's experience hold for another? Is death truly a leveller? The material covered is wide-ranging. Unlike other studies which often focus on either art or text, and on one category of objects or one literary genre, the book pulls together exemplary texts and objects, including Plato's drinking cups, Sophocles' temple sculpture, and Thucydides, and makes each accessible to readers from multiple sub-disciplines and indeed from beyond Classics. It will be critical reading for those interested in ancient attitudes to death, as well as those interested in cultural imagination and intellectual history. As a multi-media study, it will appeal to those working on ancient image and text, and their intersection, and more broadly to those in other disciplines working on visibility, mediality, materiality, and culturally situated ideas.

Panhellenes at Methone Jenny Strauss Clay, Irad Malkin, Yannis Z. Tzifopoulos, 2017-04-10 This volume discusses the multidimensional aspects of the unique and so far unprecedented find for Macedonia: 191 sherds from Methone in Pieria dated to ca 700 BCE which bear inscriptions, graffiti, and trade marks inscribed, incised, scratched, and rarely painted. The 191 vessels were unearthed during excavations in ancient Methone in Pieria, the oldest colony of Greeks from Eretria in the north, according to tradition. The Methone find is unique for two reasons. First, most of the pottery dates between 730 and 700 BCE, a period from which very few examples of Greek writing survive. And second, inscribed ceramics, scratched or painted, are extremely rare in Macedonia. This new evidence of inscribed pottery from Methone is invaluable for classical studies, and the papers of this volume contribute notably to current discussions about the Greeks and the Greek language in Macedonia, the Greek colonization, the pottery trade, and the early Greek transport amphoras trade, the symposium, and other
