Hovers,Steven Kuhn,2007-01-06 Modern human origins and the fate of the Neanderthals are arguably the most compelling and contentious arenas in paleoanthropology The much discussed split between advocates of a single early emergence of anatomically modern humans in sub Saharan Africa and supporters of various regional continuity positions is only part of the picture Equally if not more important are questions surrounding the origins of modern behavior and the relationships between anatomical and behavioral changes that occurred during the past 200 000 years Although modern humans as a species may be defined in terms of their skeletal anatomy it is their behavior and the social and cognitive structures that support that behavior which most clearly distinguish Homo sapiens from earlier forms of humans This book assembles researchers working in Eurasia and Africa to discuss the archaeological record of the Middle Paleolithic and the Middle Stone Age This is a time period when Homo sapiens last shared the world with other species and during which patterns of behavior characteristic of modern humans developed and coalesced Contributions to this volume query and challenge some current notions about the tempo and mode of cultural evolution and about the processes that underlie the emergence of modern behavior The papers focus on several fundamental questions Do typical elements of modern human behavior appear suddenly or are there earlier archaeological precursors of them Are the archaeological records of the Middle Paleolithic and

Middle Stone Age unchanging and monotonous or are there detectable evolutionary trends within these periods Coming to diverse conclusions the papers in this volume open up new avenues to thinking about this crucial interval in human evolutionary history

Children in Care, 1834-1929 Rosemary Steer, 2020-07-30 A study of the lives of Britain's children who were looked after by the government during the main period of the Poor Law Amendment Act from 1834 to 1929 For centuries there have been children who have not lived with their birth parents for a range of reasons and have been taken into the care of the state voluntary societies other families or employers temporarily or permanently The origins of this book lie in Rosemary Steer's study of the lives of over 300 children who came into the care of a charity in the village of Dickleburgh in Norfolk started in the 1870s by the Rector's wife Mrs Louisa Brandreth This book extends the study of children in care across the country to cover the main period of the Poor Law Amendment Act the new poor law from 1834 to 1929 Using a wide range of sources including contemporary social commentaries and inquiries poor law records charity case files court records newspapers parliamentary inquiries census returns parish records and personal accounts Rosemary Steer details the range of provision and explores the lives of some of these children before during and after their time in care Research into the care of pauper children has usually been anonymized but *Children in Care* includes examples of named children and through numerous case studies we hear these children's stories sometimes in their own words or those of the adults who had charge of them It is unlikely that many of these pauper children would feature in any other study other than individually within the context of family history so this book also has the benefit of highlighting the lives of some of the least regarded of society Praise for *Children in Care 1834-1929* This is a very interesting book indeed the work effort and research that has gone into this by the author is incredible and I say that as someone who has had to trawl through these types of records before It is the work of the author Steer that makes it the success it should be I would highly recommend this book to anyone but in particular I would invite all students who are learning about history social history and even law to read this book because of its reliance on source material is fantastic which is why rate 5 stars and it will probably make my top ten books of the year UK Historian

Ancient Starch Research Robin Torrence, Huw Barton, 2016-09-16 What role did plant resources have in the evolution of the human species Why and how have plants been managed and transported to new environments Where how and why were plants domesticated and why do the patterns vary in different parts of the world What is the relationship between the intensification of food production and the rise of complex societies Numerous new studies are using starch granules discovered in archaeological contexts to answer these questions and improve our knowledge of past human behavior and environmental variation Given the substantial body of successful research the time has clearly come for a comprehensive description of ancient starch research and its potential for archaeologists This book fills these roles by describing the fundamental principles underlying starch research guiding researchers through the methodology reviewing the results of significant case studies and pointing the way to future avenues for research The joint
