of science      **Cultural Implications of Biosemiotics** Paul Cobley, 2016-08-11 This is the first book to consider the major implications for culture of the new science of biosemiotics The volume is mainly aimed at an audience outside biosemiotics and semiotics in the humanities and social sciences principally who will welcome elucidation of the possible benefits to their subject area from a relatively new field The book is therefore devoted to illuminating the extent to which biosemiotics constitutes an epistemological break with modern modes of conceptualizing culture It shows biosemiotics to be a significant departure from those modes of thought that neglect to acknowledge continuity across nature modes which install culture and the vicissitudes of the polis at the centre of their deliberations The volume exposes the untenability of the culture nature division presenting a challenge to the many approaches that can only produce an understanding of culture as a realm autonomous and divorced from nature      **Media Discourses** Donald Matheson, 2005-09-16 Some of the most important questions regarding the relationship between media and culture are about communication How are the meanings which make up a culture shared in society How is power performed in the media What identities and relationships take shape there Media Discourses introduces readers to discourse analysis to show how media communication works Written in a lively style and drawing on examples from contemporary media it discusses what precisely gets represented in mediatexts who gets to do the talking what knowledge people need to share in order to understand the media and how power relations are reinforced or challenged Each chapter discusses a particular media genre including news advertising reality television and weblogs At the same time each chapter also introduces a range of approaches to media discourse from analysis of linguistic details to the rules of conversation and the discursive construction of selfhood A glossary explains key terms and suggestions for further reading are given at the end of each chapter This is a key text for media studies mass communication communication studies linguistics and journalism studies students      *Sign Studies and Semioethics* Susan Petrilli, 2014-10-09 This book examines the issues surrounding the problematic perpetuation of dominant sign systems through the framework of semioethics Semioethics is concerned with using semiotics as a powerful tool to critique the status quo and move beyond the reproduction of the dominant order of communication The aim is to present semioethics as a method to engage semiotics in an active rethink of our ability as humans to affect change      **Semiotics: Principles & Problems** Yiheng Zhao, 2025-03-06 This book attempts to build semiotics on a new foundation which is meaning making At the very beginning the central terms of signs and semiotics are redefined as the old definition for sign one thing standing for another is far from satisfactory Sign is a perception that is regarded as carrying meaning In this way semiotics now built on the foundation of meaning making and meaning cognition is a science of meaning All the principles are now under the scrutiny of the new definition and many issues are answered more succinctly Therefore the new definition is extended to the new fields of cultural activities in human society and a series of problems arise This book intends to discuss and explore these questions such as the middle reclining in the cultural markedness the sliding of motivation in art the difficult distinction between falsehood and untruthfulness and

the driving force of modernization in China
