Luttwak, 2016-05-18 A newly updated edition of this classic hugely influential account of how the Romans defended their vast empire At the height of its power the Roman Empire encompassed the entire Mediterranean basin extending much beyond it from Britain to Mesopotamia from the Rhine to the Black Sea Rome prospered for centuries while successfully resisting attack fending off everything from overnight robbery raids to full scale invasion attempts by entire nations on the move How were troops able to defend the Empire s vast territories from constant attacks And how did they do so at such moderate cost that their treasury could pay for an immensity of highways aqueducts amphitheaters city baths and magnificent temples In *The Grand Strategy of the Roman Empire* seasoned defense analyst Edward N Luttwak reveals how the Romans were able to combine military strength diplomacy and fortifications to effectively respond to changing threats Rome s secret was not ceaseless fighting but comprehensive strategies that unified force diplomacy and an immense infrastructure of roads forts walls and barriers Initially relying on client states to buffer attacks Rome moved to a permanent frontier defense around 117 CE Finally as barbarians began to penetrate the empire Rome fielded large armies in a strategy of defense in depth allowing invaders to pierce Rome s borders This updated edition has been extensively revised to incorporate recent scholarship and archeological findings A new preface explores Roman imperial statecraft This illuminating book remains essential to both ancient historians and students of modern strategy *The English Catalogue of Books [annual]* Sampson Low, 1929 Vols for 1898 1968 include a directory of publishers **Bibliography of Art and Architecture in the Islamic World (2 Vol. Set)** Susan Sinclair, C. H. Bleaney, Pablo García Suárez, 2012 Following the tradition and style of the acclaimed *Index Islamicus* the editors have created this new *Bibliography of Art and Architecture in the Islamic World* The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages except Turkish between 1906 and 2011 This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies **General catalogue of printed books** British Museum. Dept. of printed books, 1931 **Photography, Natural History and the Nineteenth-Century Museum** Kathleen Davidson, 2017-12-02 The Victorian era heralded an age of transformation in which momentous changes in the field of natural history coincided with the rise of new visual technologies Concurrently different parts of the British Empire began to more actively claim their right to being acknowledged as indispensable contributors to knowledge and the progress of

empire This book addresses the complex relationship between natural history and photography from the 1850s to the 1880s in Britain and its colonies Australia New Zealand and to a lesser extent India Coinciding with the rise of the modern museum photography's arrival was timely and it rapidly became an essential technology for recording and publicising rare objects and valuable collections Also during this period the medium assumed a more significant role in the professional practices and reputations of naturalists than has been previously recognized and it figured increasingly within the expanding specialized networks that were central to the production and dissemination of new knowledge In an interrogation that ranges from the first forays into museum photography and early attempts to document collecting expeditions to the importance of traditional and photographic portraiture for the recognition of scientific discoveries this book not only recasts the parameters of what we actually identify as natural history photography in the Victorian era but also how we understand the very structure of empire in relation to this genre at that time
