Workshop on the Origin of the Heavy Elements, 2000 This Workshop was held on September 3 4 1999 following the 10th International Symposium on Capture Gamma Ray Spectroscopy Presentations were made by 14 speakers 6 from the US and 8 from other countries on topics relevant to s r and rp process nucleosynthesis Laboratory experiments both present and planned and astrophysical observations were represented as were astrophysical models Approximately 50 scientists participated in this Workshop These Proceedings consist of copies of vu graphs presented at the Workshop For further information the interested readers are referred to the authors Rare Isotopes in Cosmic Explosions and Accelerators on Earth, 2009 Rare isotopes are nature s stepping stones to produce the heavy elements and they are produced in large quantities in stellar explosions Despite their fleeting existence they shape the composition of the universe and the observable features of stellar explosions The challenge for nuclear science is to produce and study the very same rare isotopes so as to understand the origin of the elements and a range of astronomical observations I will review the progress that has been made to date in astronomy and nuclear physics and the prospects of finally addressing many of the outstanding issues with the future Facility for Rare Isotope Beams FRIB which DOE will build at Michigan State University
