*Caring Responsibilities in European Law and Policy* Eugenia Caracciolo di Torella, Annick Masselot, 2020-02-28 This book explores the emerging engagement of EU law with care and carers The book argues that the regulation of care by the EU is crucial because it enables the development of a broad range of policies It contributes to the sustainability of society and ultimately it enables individuals to flourish Yet to date the EU approach to regulating the caring relationship remains piecemeal and lacks the underpinning of a cohesive strategy Against this backdrop this book argues that the EU can and must take leadership in this area by setting principles and standards in accordance with the values of the treaty in particular gender equality human dignity solidarity and well being The book further makes a case for a stronger protection for carers who should not only be protected against discrimination but should also be supported valued and put in a position to make choices and lead full lives In order to achieve this a proactive approach to rebalancing the relationship between paid and unpaid work is necessary Ultimately the book puts forward a series of legal and policy recommendations for a holistic approach to care in the EU

Transnational Aging Vincent Horn, Cornelia Schwappe, 2015-09-16 This book focuses on the diverse interrelationships between aging and transnationality It argues that the lives of older people are increasingly entangled in transnational contexts on the social as well as the cultural economic and political levels Within these contexts older people

both actively contribute to and are affected by border crossing processes. In addition while some may voluntarily opt for adding a transnational dimension to their lives others may have less choice in the matter. Transnational aging therefore provides a critical lens on how older people shape, organize and cope with life in contexts that are no longer bound to the frame of a single nation state. Accordingly the book emphasizes the agency of older people as well as the personal and structural constraints of their situations. The chapters in this book reveal these aspects by approaching transnational aging from different methodological angles such as ethnographic research, comparative studies, quantitative data and policy and discourse analysis. Geographically the chapters cover a wide range of countries in Africa, Asia, Europe, North and South America such as Namibia, Thailand, Russia, Germany, the United States and Ecuador.

*Working futures?* Roulstone, Alan, Barnes, Colin, 2005-11-16. *Working futures* looks at the current effectiveness and future scope for enabling policy in the field of disability and employment. By addressing the current strengths and weaknesses of disability and employment policy the book asks: Is the dichotomy of work for those who can and support for those who cannot appropriate to the lives of disabled people? Does current and recent policy reduce or reinforce barriers to paid employment? What lessons from other welfare regimes can we draw on to further disabled people's working futures? The book is original in bringing together a wide range of policy insights to bear on the question of disabled people's working futures. It includes analyses of recent policy initiatives as diverse as the Disability Discrimination Act 1995, Draft Disability Bill, the benefits system, New Deal for Disabled People, job retention policy, comparative disability policy, the role of the voluntary sector and new policies for a new workplace. Contributions from academics, NGOs, the OECD and the disabled people's movement bring multiple theoretical, professional and user perspectives to the debates at the heart of the book.

*Processes of Immigration in Rural Europe* Stefan Kordel, Igor Jelen, Tobias Weidinger, 2019-01-18. Contemporary immigration processes such as forced migration and labour induced mobility as well as lifestyle and leisure oriented movements increasingly affect areas in Europe that are considered as peripheral or rural. This edited collection sheds light on the diversity of immigration, its specific implications for development and strategies for coping. Contributions from various sub-disciplines of the social sciences including human and cultural geography, sociology and spatial planning with different regional foci encourage theoretical discussions, enhancing empirical knowledge and providing stimuli for practitioners involved in migration and development issues. The structure of the volume therefore follows four main themes: 1 conceptual reflections on immigration to peripheral rural areas and development prospects; 2 patterns and types of immigration processes drawing on various case studies from all over Europe; 3 realms of integration namely housing, economy and social life; 4 immigration management with a special emphasis on regional and local strategies undertaken by policy makers, the private sector and civil society.
