Dwyer,2022-06-20 The aim of this Handbook is to produce an interdisciplinary and international benchmark text for anyone wanting to understand job quality Job quality matters and has long and continually done so even if the terminology used to describe it has and continues to vary Debate about the future of work and job quality in the twenty first century centres on the impact of the new digital technologies of the putative fourth industrial revolution This debate compounds existing concerns about the restructuring of employment and importantly a worrying proliferation of poor quality jobs often within the context of neo liberal political economic hegemony since the early 1980s or the economic crisis that followed the Global Financial Crisis of the late 2000s Job quality is offered as a solution to challenges such as health welfare productivity innovation economic competitiveness democracy and democratic participation Bildung cultivation societal equality individual and collective quality of life and environmental sustainability As job quality is a key factor in addressing these and the other

challenges it needs to be understood in all its complexity in terms of what it affects as well as what affects it This Handbook draws together into a single volume first an explicit focus on job quality both as a significant factor in and of itself and as producing instrumental effects on a range of other processes and outcomes second a catalogue of the diverse range of multiple contributions and applications related to job quality and third the complexity and multiple interpretations of the concept of job quality Each chapter provides distinct responses to the question of why job quality matters coupled to a contention about for whom or for what job quality matters most As the chapters with their respective answers and arguments attest there are a range of ways in which job quality is relevant to an equally broad range of social economic and political concerns

A Geography of the Lifeworld (Routledge Revivals) David Seamon, 2015-06-11 Within the modern Western lifestyle increasing conflict is becoming apparent between that patchwork of isolated points such as the home or the office which are linked by a mechanical system of transportation and communication devices and a growing sense of homelessness and isolation This work first published in 1979 adopts a phenomenological perspective illustrating that this malaise may have partial roots in the deepening rupture between people and place Whereas the problems of terrestrial space may have been overcome technologically and economically it has been less successful regarding people Experience indicates that people become bound to locality and the quality of their life is thus reduced if these bonds are disrupted or broken in any way The relationship between community and place is investigated as is the opportunity for improving the environment both from a human and an ecological perspective This book will be of interest to students of human geography

perception *A Theory of Sentience* Austen Clark, 2000 Austen Clark offers a general account of the forms of mental representation that we call sensory To sense something one must have some capacity to discriminate among sensory qualities but there are other requirements What are they and how can they be put together to yield full blown sensing Drawing on the findings of current neuroscience Clark proposes and defends the hypothesis that the various modalities of sensation share a generic form that he calls feature placing Sensing proceeds by picking out place times in or around the body of the sentient organism and characterizing qualities features that appear at those place times Such feature placing is a primitive kind probably the most primitive kind of mental representation Once its peculiarities have been described many of the puzzles about the intentionality of sensation and the phenomena that lead some to label it pseudo intentional can be resolved The hypothesis casts light on many other troublesome phenomena including the varieties of illusion the problem of projection the notion of a visual field the location of after images the existence of sense data and the role of perceptual demonstratives *A Theory of Sentience* will interest anyone interested in the topics of sensation representation or phenomenal consciousness **Design for Tomorrow—Volume 1** Amaresh Chakrabarti, Ravi Poovaiah, Prasad Bokil, Vivek
