Sensedata And Perception Ge Moore And Aj Ayer:

The Metaphysics of G. E. Moore David O'Connor, 2012-12-06 In this book setting aside his consideration of specifically ethical topics I try to provide a comprehensive interpretation of Moore's thought. Against the background of this general interpretation I examine in detail his work on some of the central problems of metaphysics and because Moore's being able to sustain a consistent anti-skepticism is essential to the survival of the base from which he works on those problems of epistemology too. The interpretation of which I speak involves my taking as the centerpiece of Moore's philosophical work his book *Some Main Problems of Philosophy* written in 1910 as the text of a lecture series but left unpublished for over forty years thereafter. That book is aptly titled for the issues with which Moore deals in it are indeed among the main problems of philosophy. Not least of these are the problems of formulating a general categorical description of the world and then of defending that formulation. However while I will discuss Moore's work in light of its contribution to this project of taking metaphysical inventory it is important to note that he in common with many other major figures in contemporary analytical philosophy did not approach specific philosophical puzzles with a view to possibly integrating solutions to them into a comprehensive theory about reality as a whole that is into what might be called a metaphysical system. **Berkeley's**

Merleau-Ponty and Contemporary Philosophy of Perception Peter Antich, 2023-08-04 This book draws on Merleau-Ponty's phenomenology to develop new and promising solutions to contemporary debates about perception. In providing an extension and defense of Merleau-Ponty's account of perceptual content and of the relation between perception and the world it demonstrates the value of Merleau-Ponty's insights for philosophy of perception today. The author focuses on two main topics: the contents and the nature of perception. In the first half of this book the author tackles debates about the content of perception: namely, what sorts of properties or features of the world reveal themselves to us in perception and in what modes. Drawing on Merleau-Ponty's description of perceptual sense, the author argues that perception has a unique kind of content which cannot be adequately described in terms of sensations or concepts. He then shows how this account of perceptual sense can clarify debates about the richness of perceptual content, including whether we can perceive moral properties. In the second half he turns to the nature of perception. Here he argues that Merleau-Ponty's account of perceptual intentionality makes available a powerful combination of the core insights of two main contemporary approaches to this question: realism and intentionalism. The author shows how this combination can be developed, defends it from objections, and explains how it is equipped to deal with problems posed by the existence of illusions and hallucinations. *Merleau-Ponty and Contemporary Philosophy of Perception* will appeal to scholars and advanced students working on phenomenology and the philosophy of perception. **Sensation and Perception** D. W. Hamlyn, 2022-09-01 First published in 1961 *Sensation and Perception* aims to cast light upon the nature of perception itself. This, the author believes, can be achieved only through an

understanding of the concepts of sensation and perception A survey of the principal attempts to arrive at such an understanding brings out the fact that perception has most often been assimilated to sensation or judgment The author believes that both of these views are wrong but that an attention to the history of thought can provide an explanation of the temptation to accept them A final chapter gives the author s own views on the nature of sensation and perception As such it would be of interest both to philosophers and to those psychologists who are concerned with the nature of perception

lens In trying to understand how a concept or a set of concepts functions in the world it is important to contextualise the way it functions within three networks or constellations of meaning antecedent frameworks coextensive frameworks and pragmatic frameworks This book is constructed around these three frameworks as any text about an idea ethics or a conceptual tradition a critical realist genealogy should be It traces the genealogy of the term critical realism through the work of Roy Sellars Ludwig Wittgenstein Wilfred Sellars Richard Rorty Roy Bhaskar and Robert Brandom It sets out a theory of critical realism its genealogical semantic ethical and pragmatic elements that pays due deference to these six seminal theorists contextualising this theory as a replacement and alternative to empiricism There is a dearth of monographs and introductory texts about the most important relation in social theory and meta philosophy that of world to mind and mind to world relations and connections the critical ethical and transformational apperceptive process **Aspects of Psychologism**

Tim Crane,2014-01-02 Tim Crane takes up fundamental philosophical questions of consciousness perception and the experience of our own mental lives Psychologism in his formulation investigates the mind not only empirically and conceptually but also phenomenologically through the systematic examination of consciousness and thought from the subject's point of view *Perception* Frank Jackson,1977-05-05 What is the nature of and what is the relationship between external objects and our visual perceptual experience of them In this book Frank Jackson defends the answers provided by the

traditional Representative theory of perception He argues among other things that we are never immediately aware of external objects that they are the causes of our perceptual experiences and that they have only the primary qualities In the course of the argument sense data and the distinction between mediate and immediate perception receive detailed defences and the author criticises attempts to reduce perceiving the believing and to show that the Representative theory makes the external world unknowable Jackson recognises that his views are unfashionable but argues in detail that they are to be preferred to their currently favoured competitors It will become an obvious point of reference for all future work on the philosophy of perception A. J. Ayer: Memorial Essays Alfred Jules Ayer,1991 A J Ayer who died in 1989 was acknowledged as one of Britain's most distinguished philosophers In this memorial collection of essays leading Western philosophers reflect on Ayer's place in the history of philosophy and explore aspects of his thought and teaching The volume also includes a posthumous essay by Ayer himself A Defence of Empiricism These essays are undoubtedly a fitting tribute to a major figure but the collection is not simply retrospective rather it looks forward to present and future developments in philosophical thought that Ayer's work has stimulated *The Routledge Dictionary of Philosophy* Michael Proudfoot,A.R.

Lacey,2009-12-04 A dictionary of philosophy that includes a guide to philosophy online **The Epistemology of the Cyrenaic School** Voula Tsouna,1998-12-10 The Cyrenaic school was a fourth century BC philosophical movement related both to the Socratic tradition and to Greek Scepticism In ethics Cyrenaic hedonism can be seen as one of many attempts made by the associates of Socrates and their followers to endorse his ethical outlook and to explore the implications of his

method In epistemology there are close philosophical links between the Cyrenaics and the Sceptics both Pyrrhonists and Academics There are further links with modern philosophy as well for the Cyrenaics introduced a form of subjectivism which in some ways preannounces Cartesian views endorsed by Malebranche and Hume and developed by Kant This 1998 book reconstructs Cyrenaic epistemology explains how it depends on Cyrenaic hedonism locates it in the context of ancient debates and discusses its connections with modern and contemporary epistemological positions

Spectator in the Cartesian Theater Peter Slezak, 2023-08-01 The Cartesian Theater is Dennett's famous metaphor for the idea that a homunculus or little man watches the screen on which our thoughts appear However contrary to much academic teaching and scholarship Spectator in the Cartesian Theater Where Theories of Mind Went Wrong since Descartes shows that Descartes was not guilty of this fallacy for which he has been blamed In his physiological writings neglected by philosophers Descartes explained that the pseudo explanation arises not from what is included in our theory of consciousness but rather from what is missing We fail to notice that the theory is incomplete because we are intuitively doing part of the explanatory work That is we are the spectators in the Cartesian Theater With detailed critiques Peter Slezak shows that Searle's Chinese Room Argument Kripke's theory of proper names Davidson's semantics of natural language and Kosslyn's theory of visual imagery rely on what is intuitively meaningful to us rather than what follows from the theory Slezak offers a novel solution to the elusive logic of the Cogito argument showing it to be akin to the Liar Paradox Since Descartes perplexity is our own this shows how the subjective certainty of consciousness and the mind body problem can arise for a physical system An intelligent computer would think that it isn't one

Ontological Investigations Ingvar Johansson, 2013-05-02 This volume is devoted to problems within analytic metaphysics It defends an ontology and theory of categories inspired by Aristotle but revised in such a way as to be compatible with modern science The ontology of both natural and social reality is addressed starting out from the view that universals exist but only in the spatiotemporal world immanent realism In attempting to bring Aristotle's ontology up to date the author relies very much on the thinking of Edmund Husserl conceiving the cement of the universe as Husserlian relations of existential dependence and regarding intentionality as a non reducible category in the ontology of mind The work is thoroughly realistic in spirit but large parts of it should nonetheless be of interest to conceptualists and nominalists too
