

A dramatic landscape featuring a sunset or sunrise over a range of mountains. The sky is filled with warm, orange and yellow clouds, and the sun is visible on the left side. The mountains in the foreground are dark and silhouetted against the bright sky. The overall mood is contemplative and serene.

Our human flesh needs touch
and intimacy, what we get, or
should get, from a mother –
Woman. Shouts and whispers.

Original Skin Maryrose Cuskelly,2011-06-01 Like the air we breathe we take our skin for granted Yet it is remarkable it mitigates and ameliorates the sometimes harsh world we dwell in and is at the interface of so much of what we encounter It is our border the edge of ourselves the point where we meet our universe Original Skin is at times a scientific study remarking on the biological magic behind the human body s largest organ

At others it becomes an anthropological survey dissecting separate societies attitudes towards bare bodies and the motives behind cultural rituals such as tattoos However Original Skin is above all a celebration of the human body its tone one of absolute awe for the simultaneously protective and fragile membrane that divides us all from the world that surrounds us Maryrose Cuskelly s book in its examinations of everything from tickling to Botox to books bound in human derma is a delightful meditation on skin [Shakespeare / Skin](#) Ruben Espinosa,2024-07-11 This volume offers a comprehensive array of readings of skin in Shakespeare s works a term that embraces the human and animal noun and verb Shakespeare Skin departs from previous studies as it deliberately and often explicitly engages with issues of social and racial justice Each of the chapters interrogates and centres skin in relation to areas of expertise that include performance studies aesthetics animal studies religious studies queer theory Indigenous studies history food studies border studies postcolonial studies Black feminism disease studies and pedagogy By considering contemporary understandings of skin this volume examines how the literature of the early modern past creates paths to constructing racial hierarchies With contributors from the USA UK South Africa India Sri Lanka Singapore and Australia chapters are informed by an array of histories shedding light on how skin was understood in Shakespeare s time and at key moments during the past 400 years in different media and cultures Chapters include considerations of plays such as Titus Andronicus The Tempest and A Midsummer Night s Dream and work by Borderlands Theater Los Colochos and Satyajit Ray among many others For researchers and instructors this book will help to shape teaching and inform research through its modelling of antiracist critical practice Collectively the chapters in this collection allow us to consider how sustained attention to skin via cross historical and innovative approaches can reveal to us the various uses of Shakespeare that shed light on the fraught nature of our interrelatedness They set a path for readers to consider how much skin they have in the game when it comes to challenging structures of racism

Sculpture and Touch Peter Dent,2017-07-05 Since the Renaissance at least the medium of sculpture has been associated explicitly with the sense of touch Sculptors philosophers and art historians have all linked the two often in strikingly different ways In spite of this long running interest in touch and tactility it is vision and visuality which have tended to dominate art historical research in recent decades This book introduces a new impetus to the discussion of the relationship between touch and sculpture by setting up a dialogue between art historians and individuals with fresh insights who are working in disciplines beyond art history The collection brings together a rich and diverse set of approaches with essays tackling subjects from prehistoric figurines to the work of contemporary artists from pre modern ideas about the physiology of touch to tactile interaction in the museum environment and from the phenomenology of touch in recent philosophy to the experimental findings of scientific study It is the first volume on this subject to take such a broad approach and as such seeks to set the agenda for future research and collaboration in this area [The Smell of Battle, the Taste of Siege](#) Mark Michael Smith,2015 The Smell of Battle the Taste of Siege considers how all five senses sight sound smell taste and touch shaped the

Violence and the Genesis of the Anatomical Image Rose Marie San Juan, 2022-11-28 Nothing excited early modern anatomists more than touching a beating heart In his 1543 treatise Andreas Vesalius boasts that he was able to feel life itself through the membranes of a heart belonging to a man who had just been executed a comment that appears near the woodcut of a person being dissected while still hanging from the gallows In this highly original book Rose Marie San Juan confronts the question of violence in the making of the early modern anatomical image Engaging the ways in which power operated in early modern anatomical images in Europe and to a lesser extent its colonies San Juan examines literal violence upon bodies in a range of civic religious pedagogical and exploratory contexts She then works through the question of how bodies were thought to be constituted systemic or piecemeal singular or collective and how gender determines this question of constitution In confronting the issue of violence in the making of the anatomical image San Juan explores not only how violence transformed the body into a powerful and troubling double but also how this kind of body permeated attempts to produce knowledge about the world at large Provocative and challenging this book will be of significant interest to scholars across fields in early modern studies including art history and visual culture science and medicine
