[Alphabet Coloring in Spanish](#) Yeismar Gonzalez, Vincenzo Saverino, Antonella Saverino Gonzalez, 2019-05-08. Practical book with the ABECEDARIO PARA COLOREAR for children that will help them to know the alphabet, which is the first great step to later on learn to read and write. In this way, children can also communicate better with those around them, either to convey their ideas or to understand what others think. In addition to the same extent that they begin to relate the sounds with the spelling of each vowel or consonant, they know their mother tongue and expand their vocabulary. However, many parents do not know that learning the alphabet also has a positive impact.

on children's brain development. The simple fact of learning to articulate the sounds of letters stimulates the connection between neurons in different areas of the brain such as Wernicke's area and Broca's area, both involved in the development of language. Likewise, it favors the mental representation of abstract concepts while consolidating logical thinking. Therefore, the alphabet is one of the first lessons that children learn in school, although it is not necessary to wait until that moment to teach the first notions. Since the child begins to speak with some fluency between two years and three years, you are ready to teach some letters of the alphabet. Libro práctico con el ABECEDARIO PARA COLOREAR para niños que les ayude a conocer el alfabeto que es el primer gran paso para luego aprender a leer y escribir. De esta manera, los niños también pueden comunicarse mejor con quienes los rodean, ya sea para transmitir sus ideas o para comprender lo que piensan los demás. Además, en la misma medida en que comienzan a relacionar los sonidos con la ortografía de cada vocal o consonante, conocen su lengua materna y amplían su vocabulario. Sin embargo, muchos padres no saben que aprender el alfabeto también tiene un impacto positivo en el desarrollo cerebral. El simple hecho de aprender a articular los sonidos de las letras estimula la conexión entre las neuronas en diferentes áreas del cerebro, como el área de Wernicke y el área de Broca, ambas involucradas en el desarrollo del lenguaje. Asimismo, favorece la representación mental de conceptos abstractos al tiempo que consolida el pensamiento lógico. Por lo tanto, el alfabeto es una de las primeras lecciones que los niños aprenden en la escuela, aunque no es necesario esperar hasta ese momento para enseñar las primeras nociones. Dado que el niño comienza a hablar con cierta fluidez entre dos y tres años, está listo para enseñar algunas letras del alfabeto.
