**Modelling of Rationality... and Beyond Physics** Gh. C. Dinulescu-Campina,2002 **Bibliographia Biotheoretica, Vol. Viii ,** **The Enigma of Childhood** Ronnie Solan,2018-03-21 In this book the author traces the way that early psychic development from birth up to three years is reflected throughout our lifespan including adulthood couplehood and parenthood The inner child reverberating within us consciously and unconsciously and thus present in our ongoing interactions with others often colours and guides our current experiences whether with our life partner or children and as psychotherapists with our patients Our openness to its resonance allows us to become more attuned to and emotionally accessible to ourselves and others The author s primary aim is to familiarize the reader with her innovative idea of the emotional immune system managed by a healthy narcissism and operating via the inner reverberations of hidden childhood narratives Our sense of familiar self is accordingly consolidated and immunised to an invasion by foreign sensations The Third Level of Reality Percy Seymour,2003-03-01 The Third Level of Reality is a reprint of a book by Percy Seymour originally titled The Paranormal Beyond Sensory Science This edition features a new foreword by Colin Wilson TOTAL REALITY CONSISTS OF THREE LEVELS The first level of reality is the reality of the five senses The second level of reality is that which results from the response of humans and animals to magnetic fields This response can not only be used to find direction time and location in space but it also allows us to understand some of the links between human personality and the state of the cosmos at the birth of each individual The third level of reality requires a reformulation of our concepts of space and time The main concept at the basis of this level is that some pairs of points in space anchored on two types of subatomic particle are linked by two different levels of space only one of which is accessible to our five normal senses and scientific instruments This other space let s call it extrasensory space is not limited by the speed of light Here particles and events are instantaneously linked to those particles and events with which they last interacted This approach to space and time makes it possible to understand a wide variety of phenomena relating to subatomic physics and to phenomena that we currently classify as paranormal including the human aura apparitions telepathy clairvoyance and our ability to look into the future
