Jean Ayres, Jeff Robbins, 2005 When *Sensory integration and the child* was first published in the 1970s it was designed to help professional as well as the doctors therapists teachers and parents In order to make the information more accessible to families this new edition has preserved the core content and practical solutions while moving technical sections to the appendixes **The Encyclopedia of Learning Disabilities** Carol Turkington, Joseph Harris, 2006 A complete reference to all types of learning disabilities **The Nature of Learning Disabilities** Kenneth A. Kavale, Steven R. Forness, 2012-12-06 The category of learning disabilities continues to be among the most contentious in special education Much of the debate and dissent emanates from a lack of understanding about its basic nature The failure to evolve a comprehensive and unified perspective about the nature of learning disabilities has resulted in the concept being lost The loss is best illustrated through the failure to answer this seemingly simple question What is a learning disability Using historical empirical theoretical conceptual and philosophical analyses this volume explores a number of problems and issues facing the field of learning disabilities The chapters cover historical influences definitional problems primary characteristics assessment practices theoretical development major themes research and measurement models and long term outcomes The goal is to explicate the nature of learning disabilities by analyzing what it was supposed to be what it has become and what it might be A predominant theme running through this text is the necessity for the field of learning disabilities to regain integrity by recapturing its essence Learning Disorders Peter Westwood, 2017-07-14 What are learning disorders How can schools endeavour to address these disorders in today's inclusive classrooms This book answers these important questions in practical terms and discusses in detail the instructional needs of students with dyslexia dysgraphia dyscalculia dyspraxia and other significant disorders that affect learning Peter Westwood draws on international research literature to provide supporting evidence of best practices The book is unique in linking the teaching methods recommended for overcoming learning problems directly to each of the three tiers of support in the Response to Intervention Model It presents examples of effective whole class teaching intensive small group instruction and individual tutoring as well as addressing key topics such as educational progress of students with learning disorders principles for teaching dyslexic students difficulties with writing and spelling developing students numeracy skills specific intervention strategies nonverbal learning disabilities Learning Disorders will be of interest to practising teachers trainee teachers teaching assistants educational psychologists school counsellors and parents It will also provide valuable insights for any school planning to upgrade its support system for students with special educational needs *Handbook of Cognitive, Social, and Neuropsychological Aspects of Learning Disabilities* Stephen J. Ceci, 2013-01-11 Recognized as the definitive reference in the field this book addresses a broad range

of biologically based disorders that affect children's learning and development. Leading authorities review the genetics of each disorder, its course and outcome, associated developmental, cognitive, and psychosocial challenges, and what clinicians and educators need to know about effective approaches to assessment and intervention. Coverage encompasses numerous lower incidence neurodevelopmental disabilities as well as more frequently diagnosed learning and behavior problems with a genetic component.

Learning Disabilities and Brain Function William H. Gaddes, 2013-04-17 Some may say that this book is long overdue; others, including myself, will state that the book appears at just the right time. The latter is likely more true for it is doubtful that many in the professions would until now link issues of learning disabilities with those of neurophysiological dysfunction in the manner in which ultimately must be the case. As a matter of fact, there are those who deny the relationship completely. Lee Wiederholt, 1974. In his short but excellent review of the historical perspectives of learning disabilities, he traces the early interest in this problem to the work of Gall, 1802, and to his successors.

Broca 1861 Jackson 1864 Bastian 1869 and a few others Each of these men would at the time of this writing be considered to have interests in the field of neurology although at the time of their investigations neurology per se was but a gleam in the eye of the anatomical beholder A relative detour then took place Cerebral palsy in the decades of the 1940s and 1950s caught the attention of researchers through the work of Winthrop Morgan Phelps orthopedist and George Deaver physiatrist and one or two other medically oriented individuals This was related to the writings of W J Little 1810 1894 It was however Kurt Goldstein Heinz Wemer both eminent German scientists and Alfred A Diagnosing Learning Disorders, Second Edition Bruce F. Theory and Research in Learning Disabilities J.P. Das, 2013-11-11 Although a number of books have appeared on learning disabilities we feel that the present book has two distinct features which are not found in most others It is multidisciplinary and it combines theory with practice A group of researchers from the disciplines of Psychology including medical psychology and information processing Reading Special Education and Physical Education interacted with each other before and after their presentations in a conference November 1980 at the University of Alberta Edmonton Canada and then wrote their chapters for this book We hope that their chapters were enriched by the discussions and arguments which happened in formal and informal settings during the authors stay in Edmonton Dr Leong could not attend the conference but was asked to write the introductory chapter for the book The contributors to this volume have been involved with basic research as well as with clinical and educational research in learning disabilities Some of them have a theoretical rather than a practical interest However a serious interest in a handicapping condition perhaps compels one to consider its amelioration no matter how pure is the researcher It is because of such a feeling that those who do basic research have suggested procedures for applying their findings The result is a balanced product entailing theory and practice Learning Disorders And Disorders Of The Self In Children And Adol Joseph Palombo, 2001-10-02 It addresses the concerns of two audiences psychotherapists who treat children and adolescents with learning disorders and professionals such as neuropsychologists clinical and school psychologists and learning disability specialists who are involved in the assessment and remediation of children's learning disorders
