Serials and continuing resources present a variety of unique challenges in bibliographic management from special issues and unnumbered supplements to recording the changes that a long-running periodical can experience over time. Easing catalogers through the RDA Resource Description and Access transition by showing the continuity with past practice, serials cataloging expert Jones frames the practice within the structure of the FRBR and FRAD conceptual models on which RDA is based. With serials special considerations in mind, he explains the similarities and differences between AACR2 and RDA. Demonstrates how serials catalogers work fits in the cooperative context of OCLC, CONSER, and NACO. Presents examples of how RDA records can ultimately engage with the Semantic Web. Occasional serials catalogers and specialists alike will find useful advice here as they explore the structure of the new cataloging framework. *The 21st Century Academic Library* Mary K. Bolin, 2017-08-23. The 21st Century Academic Library: Global Patterns of Organization and Discourse discusses the organization of academic libraries drawing on detailed research and data. The organization of the library follows the path of a print book or journal: acquisitions, cataloging, circulation, reference, instruction, preservation, and general administration. Most libraries still have public services and technical services and are still very print-based in their organization while their collections and services are increasingly electronic and virtual. This book gathers information on organizational patterns of large academic libraries in the US and Europe, providing data that could motivate libraries to adopt innovative organizational structures or assess the effectiveness of their current organizational patterns. Contributes to the literature on the globalization of information and of library and information science. Analyzes and presents data in a way that allows librarians and library administrators to consider what organizational patterns are the most effective for the goals they are pursuing. Includes emerging patterns that are not widely seen in the academic library population. Experimentation and Collaboration North American Serials Interest Group. Conference, Charlene N. Simser, 1998.
