Unbuilt Utopian Cities 1460 to 1900: Reconstructing their Architecture and Political Philosophy Tessa Morrison,2016-03-09

Bringing together ten utopian works that mark important points in the history and an evolution in social and political philosophies this book not only reflects on the texts and their political philosophy and implications but also their architecture and how that architecture informs the political philosophy or social agenda that the author intended Each of the ten authors expressed their theory through concepts of community and utopian architecture but each featured an architectural solution at the centre of their social and political philosophy as none of the cities were ever built they have remained as utopian literature Some of the works examined are very well known such as Tommaso Campanella s Civitas Solis while others such as Joseph Michael Gandy s Designs for Cottages are relatively obscure However even with the best known works this volume offers new insights by focusing on the architecture of the cities and how that architecture represents the author s political philosophy It reconstructs the cities

through a 3 D computer program ArchiCAD using Artlantis to render Plans sections elevations and perspectives are presented for each of the cities The ten cities are Filarete Sforzina Albrecht Durer Fortified Utopia Tommaso Campanella The City of the Sun Johann Valentin Andreae Christianopolis Joseph Michael Gandy An Agricultural Village Robert Owen Villages of Unity and Cooperation James Silk Buckingham Victoria Robert Pemberton Queen Victoria Town King Camp Gillette Metropolis and Bradford Peck The World a Department Store Each chapter considers the work in conjunction with contemporary thought the political philosophy and the reconstruction of the city Although these ten cities represent over 500 years of utopian and political thought they are an interlinked thread that had been drawn from literature of the past and informed by contemporary thought and society The book is structured in two parts The Idea of the Cottage in English Architecture, 1760 - 1860 Daniel Maudlin,2015-07-24 The Idea of the Cottage in English Architecture is a history of the late Georgian phenomenon of the architect designed cottage and the architectural discourse that articulated it It is a study of small buildings built on country estates and not so small buildings built in picturesque rural settings resort towns and suburban developments At the heart of the English idea of the cottage is the Classical notion of retreat from the city to the countryside This idea was adopted and adapted by the Augustan infused culture of eighteenth century England where it gained popularity with writers artists architects and their wealthy patrons who from the later eighteenth century commissioned retreats gate lodges estate workers housing and seaside villas designed to appear as cottages The enthusiasm for cottages within polite society did not last By the mid nineteenth century cottage related building and book publishing had slowed and the idea of the cottage itself was eventually lost beneath the Tudor barge boards and decorative chimneystacks of the Historic Revival And yet while both designer and consumer have changed over time the idea of the cottage as the ideal rural retreat continues to resonate through English architecture and English culture A Series of Plans for Cottages Or Habitations of the Labourer...adapted as Well to Towns as to the Country ,1972
