 Carl Romney,2012-04-23 This memoir outlines the life of a scientist spanning much of the twentieth century It began at a time before radios were found in most American homes and before the advent of talking pictures His interest in science was born at an early age sparked by his mother as she introduced him to the stars in a dark Utah sky Early experiences and training were much the same as for any other boy at the time But with the beginning of war in Europe and the U S response by instituting universal conscription the draft he realized the importance of education in fulfilling his military obligation and enlisted in a Navy training program Navy service took him to Chicago and Southern California and eventually to little known Peleliu Island in the Western Pacific a foretaste of a life of frequent travel to follow World War II was followed all too soon by the retreat of the Soviet Union behind an Iron Curtain of secrecy a massive buildup of conventional forces and armed occupation of neighboring countries It became essential to know when they succeeded in building the atomic bomb This book is a first hand account in non technical terms of some of the ways in which this was accomplished This was followed by attempts to ban the bomb or at least to ban nuclear testing The author was fortunate to be near the center of U S efforts in many of these attempts and the book describes important activities and events that ultimately led to achieving the lesser of these goals *Baily's Magazine of Sports and Pastimes* Tresham Gilbey,1904 *Field & Stream* ,1969-08 FIELD STREAM

or as near to one as he can be while still having as much fun as he can while fishing My Turn is the first story the author ever wrote It came after the death of his father and it was part of the grieving process the author went through The story tells of the changing of the guard when the son becomes the leader and mentor and fulfills one of his father s lifelong dreams with surprising results Fixing a Roof is a whimsical tale of grown men deciding to play hooky for the day and go fishing This is where you meet Alan the author s brother and are introduced to one of Alan s friends Lake Ontario is an ongoing process it started in 1987 when the author s father died and chronicled the first eight years of an ongoing trip that continues even to today In this tale you become more acquainted with Doug the author s son and he becomes a vital part of the rest of the saga New Jersey Trout is the exploration into new waters and the discovery of a whole new fishery Along the way the author meets new friends and bonds closely with his son Tiger Muskies is the start of something new the author has stepped up and bought a bigger boat The small lake fishing and wading by the edge of the streams has been replaced by fishing for trophy sport fish It is also the second story written by the author Thoughts on Retirement is a reflective essay that was written one afternoon in August when the author was sitting down in his shed by the lake and was a little scared of what the future would bring For the first time in fifty years the author was free of any obligations Shark Fishing at Montau
