Cinema is simple Can a visual medium such as cinema put in greater perspective diverse aspects of human experience Films are usually sorted by genres but by applying metaphysical existential categories to cinema the author enables readers to reflect on the nature and essence of existence by making life appear less transparent to itself Undoubtedly the connection between sensual reality and philosophical reflection is often glossed over when the emphasis is placed on theoretical abstractions and not life itself While this work is a reflection on the philosophy of existence the author embraces a practical approach to the metaphysical existential foundation of human existence Cinematic Fictions David Seed,2012-01-01 The phrase cinematic fiction has now been generally accepted into critical discourse but is usually applied to post war novels This book asks a simple question given their fascination with the new medium of film did American novelists attempt to apply cinematic methods in their own writings From its very beginnings the cinema has played a special role in defining American culture Covering the period from the 1910s up to the Second World War Cinematic Fictions offers new insights into classics like The Great Gatsby and The Grapes of Wrath discussing major writers critical writings on film and active participation in film making Cinematic Fictions is also careful not to portray cinema as a single or stable entity Some novelists drew on silent film others looked to the Russian theorists for inspiration and yet others turned to continental film makers rather than to Hollywood Film itself was constantly evolving during the first decades of the twentieth century and the writers discussed here engaged in a kind of dialogue with the new medium selectively pursuing strategies of montage limited point of view and scenic composition towards their different ends Contrasting a diverse range of cinematic and literary movements this will be compulsory reading for scholars of American literature and film
