Expanding Boundaries: Systems Thinking in the Built Environment Guillaume Habert, Arno Schlueter, 2016-08-15 Consuming over 40% of total primary energy, the built environment is in the centre of worldwide strategies and measures towards a more sustainable future. To provide resilient solutions, a simple optimisation of individual technologies will not be sufficient. In contrast, whole system thinking reveals and exploits connections between parts. Each system interacts with others on different scales: materials, components, buildings, cities and domains: ecology, economy and social. Whole system designers optimize the performance of such systems by understanding interconnections and identifying synergies. The more complete the design integration, the better the result. In this book, the reader will find the proceedings of the 2016 Sustainable Built Environment (SBE) Regional Conference in Zurich. Papers have been written by academics and practitioners from all continents to bring forth the latest understanding on systems thinking in the built environment.

Lost Restaurants of Asheville Nan K. Chase, 2019-12-02 Asheville has been a restaurant town for two centuries since stagecoaches arrived, bringing the first tourists. Neighborhood cafés and busy lunch counters, raucous roadhouses and white linen dining rooms provided the backdrop for much of Asheville's development as a world-class foodie destination. Some like the Stockyard Cafe and Three Brothers Restaurant have vanished without a trace, while others including the Art Deco S.W. Cafeteria and the Woolworth soda fountain are easy to spot because they have barely changed. Longtime residents will recognize recipes for Rabbit's apple cinnamon pork chops and High Tea Café's Eggnog. Colbert Author Nan K. Chase reveals the hidden history of Asheville's restaurants, including the struggles of desegregation and the decades when downtown Asheville was almost dead.
