The Old Man and the Sea Anthony Smith, 2015-02-26 Octogenarian Anthony Smith's journey was originally inspired by both the Kontiki Expedition of Thor Heyerdahl who he knew and the incredible story of the survivors of a 1940 boat disaster who spent 70 days adrift in the Atlantic eventually reaching land emaciated and close to death While this might sound like a voyage no one would wish to emulate to octogenarian Anthony Smith it sounded like an adventure and he placed a typically straightforward advertisement in the Telegraph that read Fancy rafting across the Atlantic Famous traveller requires 3 crew Must be OAP Serious adventurers only In his inimitable style Smith details their voyage and the hardships they endured with a matter of fact air that makes his story seem all the more impressive His advanced age allows him a wider perspective not only on the journey but on life itself and his never say die attitude to the difficulty of the journey is inspirational Old men ought to be explorers said T S Eliot and this book certainly gives a compelling argument in his favour It is both a great story a huge storm on the final night of the voyage almost wrecked them on a reef and a call to action for the older generation do not go quietly says Anthony Smith but seek out adventure as long as you are able

The Quest for the True Figure of the Earth Michael Rand Hoare,2017-09-08 In the 1730s two expeditions set out from Paris on extraordinary journeys the first was destined for the equatorial region of Peru the second headed north towards the Arctic Circle Although the eighteenth century witnessed numerous such adventures these expeditions were different Rather than seeking new lands to conquer or mineral wealth to exploit their primary objectives were scientific to determine the Earth s precise shape by measuring the variation of a degree of latitude at points separated as nearly as possible by a whole quadrant of the globe between Equator and North Pole Although such information had consequences for navigation and cartography the motivation was not simply utilitarian Rather it was one theme among many in an intellectual revolution in which advances in mathematics paralleled philosophical strife and reputations of the living and the dead stood to be elevated or destroyed In particular the two expeditions hoped to prove the correctness of Isaac Newton s prediction that the Earth is not a perfect sphere but flattened at the poles In this study the Figure of the Earth controversy is for the first time comprehensively explored in all its several dimensions It shows how a largely neglected episode of European science that produced no spectacular process or artefact beyond a relatively minor improvement in maps nevertheless represents an almost unique combination of theoretical prediction and empirical method It also details the suffering of the two teams of scientists in very different extremes of climate whose sacrifices for the sake of knowledge rather than colonial gain caught the imagination of the literary world of the time

The Lady Vanishes Valeria Finucci, 1992 The Lady Vanishes focuses on the representation of women in two key works of the Italian Renaissance Baldassarre Castiglione's treatise *Il libro del cortegiano* The Book of the Courtier and Ludovico Ariosto's chivalric romance *Orlando Furioso* Using feminist deconstructive and psychoanalytical arguments the author investigates power relations and the construction of women's subjectivities in sixteenth century debates on women and popular narratives The book examines the construction of women in different modes woman as exemplary model and as ridiculed object woman as narcissistically self centered and as masochistically altruistic woman as subject of desire and as object of desire woman as ambiguously gendered and as radical spectacle of femininity Because they offer an array of characters ranging from masculine women to feminized men and experiment with many forms of transgressive desire Castiglione and Ariosto provide the perfect arena for problematizing the Italian Renaissance discourses on gender and sexual difference on the production of pleasure and theories of selfhood and on the body and modes of spectatorship The author argues that women are indispensable to Castiglione's conversation on the courtier and the court lady not because as is often contended he was sympathetic toward women but because he found women useful for their central role in the male construction of men's own image As for Ariosto he resolves his narrative by subsuming women to culture and society thus sealing out disorder Although at times portraying female rebellion and resentment as empowering in the end he punishes women displaying these qualities by banishing them from the text In contrast he celebrates the acquiescent woman in the figure of the lady warrior Bradamante who upon resuming a properly feminine role becomes the progenitrix of a dynasty The Italian Renaissance discourse on women cast them in both assertive and docile roles In the end however they were restrained or expelled their society could envision a freer order for men but not for women
