Lost Theory Of Asclepiades Of Bithynia:

The Lost Theory of Asclepiades of Bithynia J. T. Vallance, 1990 Asclepiades who advocated a therapy involving wine and passive exercise devised a peculiar physical theory to explain all biological phenomena None of his work survives intact but copious ancient testimonies allow us to reconstruct many details of the theory A History of Medicine: Roman medicine Plinio Prioreschi, 1996 Heraclides of Pontus Elizabeth Pender, 2017-07-28 Heraclides of Pontus hailed from the shores of the Black Sea He studied with Aristotle in Plato's Academy and became a respected member of that school During Plato's third trip to Sicily Heraclides served as head of the Academy and was almost elected its head on the death of Speusippus Heraclides interests were diverse He wrote on the movements of the planets and the basic matter of the universe He adopted a materialistic theory of soul which he considered immortal and subject to reincarnation He discussed pleasure and like Aristotle he commented on the Homeric poems In addition he concerned himself with religion music and medical issues None of Heraclides works have survived intact but in antiquity his dialogues were much admired and often pillaged for sententiae and the like The contributions presented here comment on Heraclides life and thought They include La Tradizione Papirologica di Eraclide Pontico by Tiziano Dorandi Heraclides Intellectual Context by Jorgen Mejer and Heraclides of Pontus and the Philosophical Dialogue by Matthew Fox There is also discussion of Heraclides understanding of pleasure and of the human soul Heraclides on Pleasure by Eckart Schuttrumpf and Heraclides on the Soul and Its Ancient Readers by Inna Kupreeva In addition there are essays that address Heraclides physics and astronomical theories Unjointed Masses A Note on Heraclides Physical Theory by Robert W Sharples Heliocentrism in or out of Heraclides by Paul T Keyser The Reception of Heraclides Theory of the Rotation of the Earth from Posidonius to Simplicius Texts Contexts and Continuities by Robert B Todd and Alan C Bowen and Heraclides of Pontus on the Motions of Venus and Mercury by Alan C Bowen and Robert B Todd Finally there are essays that view Heraclides from the stand point of ancient medicine literary criticism and musical theory Heraclides on Diseases and on the Woman Who Did Not Breathe by **Galen's Theory of Black Bile** Keith Andrew Stewart, 2018-10-22 In Galen's Theory of Black Bile Hippocratic Tradition Manipulation Innovation Keith Stewart investigates Galen's writing on black bile to explain health and disease and shows that Galen sometimes presented this humour as three substances with different properties that can either be harmful or beneficial to the body Keith Stewart analyses the most important treatises for Galen's physical description and characterisation of black bile and challenges certain views on the development of this humour such as the importance of the content of the Hippocratic On the Nature of Man This analysis allows us to understand how and why Galen defines and uses black bile in different ways for his arguments that cannot always be reconciled with the content of his sources Knowledge and Culture in the Early Dutch Republic Klaas Berkel, Albert Clement, Arjan Dixhoorn, 2025-10-01 The Dutch Republic around 1600 was a laboratory of the Scientific Revolution of the seventeenth century Here conditions were favourable for the development of new ways of knowing nature

and the natural philosopher Isaac Beeckman who was born in Middelburg in 1588 was a seminal figure in this context. He laid the groundwork for the strictly mechanical philosophy that is at the heart of the new science. Descartes and others could build on what they learned directly or indirectly from Beeckman. As previous studies have mainly dealt with the scientific content of Beeckman's thinking, this volume also explores the wider social, scientific, and cultural context of his work. Beeckman was both a craftsman and a scholar and fruitfully combined artisanal ways of knowing with international scholarly traditions. Beeckman's extensive private notebook offers a unique perspective on the cultures of knowledge that emerged in this crucial period in intellectual history. *Livia* Anthony A. Barrett, 2020-08-11. The author of *Rome Is Burning* separates fact from fiction as he examines the life of an ancient Roman figure made famous in the TV miniseries *I, Claudius*. Livia, wife of the first Roman emperor, Caesar Augustus, and mother of the second, Tiberius, wielded extraordinary power at the center of Roman politics. In this biography of Livia, the first in English, Anthony Barrett sets aside the portrait of a cunning and sinister schemer to reveal Livia as a complex figure whose enduring political influence helped shape Roman government long after her death. An excellent biography of Livia as appealing to the general reader as it is satisfying to the scholar. Colin M. Wells, Trinity University, San Antonio. In reading Anthony Barrett's biography of Livia, I not only learned about this remarkable woman but also gained a meaningful appreciation of life and society in her time. Howard Alper, President, The Royal Society of Canada. First rate. Mary Beard, *Times Literary Supplement*.

Mental Disorders in the Classical World William V. Harris, 2013-03-15. The historians, classicists, and psychiatrists who have come together to produce *Mental Disorders in the Classical World* aim to explain how the Greeks and their Roman successors conceptualized, diagnosed, and treated mental disorders. The Greeks initiated the secular understanding of mental illness and have left us a large body of penetrating and thought-provoking writing on the subject ranging in time from Homer to the sixth century AD. With the conceptual basis of modern psychiatry once again under intense debate, we need to learn from other rational approaches even when they lack modern scientific underpinnings. Meanwhile, this volume adds a rich chapter to the cultural and medical history of antiquity. The contributors include a high proportion of the best-regarded scholars in this field, together with papers by some of its rising stars.

Tools and the Organism Colin Webster, 2023-11-24. Medicine is itself a type of technology involving therapeutic tools and substances, and so one way to write the history of medicine is as the application of different technologies to the human body. In *Tools and the Organism*, Colin Webster argues that over the course of antiquity, notions shifted about what type of object a body is, what substances constitute its essential

nature and how its parts interact By following these changes and taking the question of technology into the heart of Greek and Roman medicine Webster reveals how the body was first conceptualized as an organism a functional object whose inner parts were tools organa that each completed certain vital tasks Webster's approach provides both an overarching survey of the ways that technologies impacted notions of corporeality and corporeal behaviors and at the same time stays attentive to the specific material details of ancient tools and how they informed assumptions about somatic structures substances and inner processes For example by turning to developments in water delivery technologies and pneumatic tools we see how these changing material realities altered theories of the vascular system and respiration across Classical antiquity Tools and the Organism makes the compelling case for why telling the history of ancient Greco Roman medical theories from the Hippocratics to Galen should pay close attention to the question of technology Selling points Tour de force survey of ancient medicine First book to demonstrate how the body got its organs and what this has to do with ancient technologies For anyone interested in ancient culture science medicine and technology
