Japanese Education Reform Christopher P. Hood, 2003-09-02 The Japanese education system has attracted increasing attention over the past 20 years largely due to the belief that it has been central to Japan s economic growth Many have felt however that the system is stunted by an inability or perhaps even on an incapacity to change This study challenges these contentions It examines the reform policies implemented by Prime Minister Nakasone during the 1980s and argues that not only has the system changed considerably as a result of Nakasone s work but that it continues to do so It analyses the key areas of the education reform debate in particular internationalism government control of education increased liberalization and various social problems and considers the degree to which response to them have been successful This book will be of great interest to all those interested in the Japanese educational system

Reimagining Japanese Education David Blake Willis, Jeremy Rappleye, 2011-05-16 Sparked by the confluence of accelerating domestic transformation and increasingly explicit impacts from globalization the Japanese education system has undergone tremendous changes during the turbulence of the past decade This volume which brings together some of the foremost scholars in the field of Japanese education analyzes these recent changes in ways that help us reimagine Japan and Japanese educational change at this critical juncture Rather than simply updating well worn Western images of Japan and its educational system the aim of the book is a much deeper critical rethinking of the outmoded paradigms and perspectives that have rendered the massive shifts that have taken place in Japan largely invisible to or forgotten by the outside world This reimagining thus restores Japan to its place as a key comparative link in the global conversation on education and lays out new pathways for comparative research and reflection Ranging

widely across domains of policy and practice and with a balance of Japanese and foreign scholars the volume is also indicative of new directions in educational scholarship worldwide approaches that center global interactions on domestic education and contribute to a far greater recognition of the polycentric polycontextual World unfolding today This book will be of keen interest to scholars of education worldwide as well as those working in and across anthropology sociology policy studies political science and area studies given that contemporary transformations in Japan at once reflect and approximate political social and educational shifts occurring throughout the World in the early decades of the 21st century

**National Standards and School Reform in Japan and the United States** Gary DeCoker, 2002 Explores the implications of a national US curriculum through the study of Japanese education It suggests that the US educational system lacks certain organizational mechanisms that support student achievement and would facilitate teacher involvement in the educational reform process

Japanese Educational Reform Jie Qi, 2001 *The Organisational Dynamics of University Reform in Japan* Jeremy Breaden, 2012 For several decades internationalisation has been a cornerstone of both Japanese government higher education policy and approaches to reform at an institutional level but Japan has still not managed to lose its reputation as a somewhat reclusive member of the global academic community Consensus on the potential of internationalisation to reinvigorate Japanese higher education is matched by the depth of recognition that universities have to date failed to internationalise successfully This book offers a new approach to Japan's internationalisation conundrum by proceeding from the inside out It presents an extended case study one university organisation that has been changed through its adoption of a radical program of internationalisation Through this case study Jeremy Breaden identifies patterns by which internationalisation is situated in administrative discourse and individual action and determines how these patterns in turn shape organisational practice The result is a multi dimensional narrative of organisational change that advances our understanding of both the dynamics of university reform and the concept of internationalisation one of the most durable yet contentious themes in the study of contemporary Japanese society With detailed analysis and an in depth case study this book will be of interest to students and scholars of Japanese studies sociology and anthropology It will also prove valuable to professionals and policy makers working in higher education both in Japan and around the world

**Japanese Education** Roberta E. Pike, 2007 Presents a large representative sample of the literature on Japanese education with an emphasis on its psychosocial aspects Many discussions compare the Japanese educational system with that of the United States and other countries The citations cover most of the 1990s including a few earlier and later references Includes extensive discussions about Japanese educational reform movements and their consequences Also cites published and unpublished dissertations and theses Updates the last comprehensive English language bibliography on Japanese education published by Ulrich Teichler in 1974 The citations were taken from many online databases Suitable for students teachers scholars and the general public

**Changing Histories** Ryôta Nishino, 2011 The teaching of history in South African and Japanese schools

has attracted sustained criticism for the alleged attempts to conceal the controversial aspects of their countries past and to inculcate ideologies favourable to the ruling regimes This book is the first attempt to systematically compare the ways in which education bureaucracy in both nations dealt with opposition and critics in the period from ca 1945 to 1995 when both countries were dominated by single party governments for most of the fifty years The author argues that both South African and Japanese education bureaucracy did not overtly express its intentions in the curriculum documents or in the textbooks but found ways to enhance its authority through a range of often subtle measures A total of eight themes in 60 officially approved Standard 6 South African and Japanese middle school history textbooks have been selected to demonstrate the changes and continuity This work hopes to contribute to the existing literature of comparative history by drawing lessons that would probably not have emerged from the study of either country by itself

*Education Policy and Equal Opportunity in Japan* Akito Okada, 2011-12-01 In many societies today educational aims or goals are commonly characterized in terms of equality equal opportunity equal access or equal rights the underlying assumption being that equality in some form is an intelligible and sensible educational ideal Yet there are different views and lively debates about what sort of equality should be pursued in particular the issue of equality of educational opportunity has served as justification for much of the postwar restructuring of educational systems around the world The author explores different interpretations of the concept of equality of educational opportunity in Japan especially as applied to post World War II educational policies By focusing on the positions taken by key actors such as the major political parties central administrative bodies teachers unions and scholars he describes how their concepts have developed over time and in what way they relate to the making of educational policy especially in light of Japan's falling birthrate and aging society

Postwar History Education in Japan and the Germanys Julian Dierkes,2010-12-14 How did East and West Germany and Japan reconstitute national identity after World War II Did all three experience parallel reactions to national trauma and reconstruction History education shaped how these nations reconceived their national identities Because the content of history education was controlled by different actors history education materials framed national identity in very different ways In Japan where the curriculum was controlled by bureaucrats bent on maintaining their purported neutrality materials focused on the empirical building blocks of history who where what at the expense of discussions of historical responsibility In East Germany where party cadres controlled the curriculum students were taught that World War II was a capitalist aberration In West Germany where teachers controlled the curriculum students were taught the lessons of shame and then regeneration after historians turned away from grand national narratives This book shows that constructions of national identity are not easily malleable on the basis of moral and political concerns only but that they are subject to institutional constraints and opportunities In an

age when post conflict reconstruction and reconciliation has become a major focus of international policies the analysis offers important implications for the parallel revision of portrayals of national history and the institutional reconstruction of policy making regimes

**Global Japan** Roger Goodman, Ceri Peach, Ayumi Takenaka, Paul White, 2005-06-27 The Japanese have long regarded themselves as a homogenous nation clearly separate from other nations However this long standing view is being undermined by the present international reality of increased global population movement This has resulted in the establishment both of significant Japanese communities outside Japan and of large non Japanese minorities within Japan and has forced the Japanese to re conceptualise their nationality in new and more flexible ways This work provides a comprehensive overview of these issues and examines the context of immigration to and emigration from Japan It considers the development of important Japanese overseas communities in six major cities worldwide the experiences of immigrant communities in Japan as well as assessing the consequences for the Japanese people s view of themselves as a nation
