**Affective Dialogue Systems** Elisabeth Andre, Laila Dybkjaer, Wolfgang Minker, Paul Heisterkamp, 2004-06-08 Human conversational partners are able at least to a certain extent to detect the speaker's or listener's emotional state and may attempt to respond to it accordingly When instead one of the interlocutors is a computer a number of questions arise such as the following To what extent are dialogue systems able to simulate such behaviors Can we learn the mechanisms of emotional behaviors from observing and analyzing the behavior of human speakers How can emotions be automatically recognized from a user's mimics gestures and speech What possibilities does a dialogue system have to express emotions itself And very importantly would emotional system behavior be desirable at all Given the state of ongoing research into incorporating emotions in dialogue systems we found it timely to organize a Tutorial and Research Workshop on Affective Dialogue Systems ADS2004 at Kloster Irsee in Germany during June 14-16 2004 After two successful ISCA Tutorial and Research Workshops on Multimodal Dialogue Systems at the same location in 1999 and 2002 we felt that a workshop focusing on the role of affect in dialogue would be a valuable continuation of the workshop series Due to its interdisciplinary nature the workshop attracted submissions from researchers with very different backgrounds and from many different research areas working on for example dialogue processing speech recognition speech synthesis embodied conversational agents computer graphics animation user modelling tutoring systems cognitive systems and human computer interaction

*The Handbook on Socially Interactive Agents* Birgit Lugrin, Catherine Pelachaud, David Traum, 2021-09-17 The Handbook on Socially Interactive Agents provides a comprehensive overview of the research fields of Embodied Conversational Agents Intelligent Virtual Agents and Social Robotics Socially Interactive Agents SIAs whether virtually or physically embodied are autonomous agents that are able to perceive an environment including people or other agents reason decide how to interact and express attitudes such as emotions engagement or empathy They are capable of interacting with people and one another in a socially intelligent manner using multimodal communicative behaviors with the goal to support humans in various domains Written by international experts in their respective fields the book summarizes research in the many important research communities pertinent for SIAs while discussing current challenges and future directions The handbook provides easy access to modeling and studying SIAs for researchers and students and aims at further bridging the gap between the research communities involved In two volumes the book clearly structures the vast body of research The first volume starts by introducing what is involved in SIAs research in particular research methodologies and ethical implications of developing SIAs It further examines research on appearance and behavior focusing on multimodality Finally social cognition for SIAs is investigated using different theoretical models and phenomena such as theory of mind or pro sociality The second volume starts with perspectives on interaction examined from different angles such as interaction in social space group interaction or long term interaction It also includes an extensive overview summarizing research and systems of human agent platforms and of some of the major application areas of SIAs such as education aging support autism and games

**Biometric ID Management and Multimodal Communication** Julian Fierrez, Javier Ortega-Garcia, Anna Esposito, Andrzej Drygajlo, Marcos Faundez-Zanuy, 2009-09-07 This book constitutes the research papers presented at the Joint 2101 2102 International Conference on Biometric ID Management and Multimodal Communication BioID\_MultiComm 09 is a joint International Conference organized cooperatively by COST Actions 2101 2102 COST 2101 Action is focused on Biometrics for Identity Documents and Smart Cards BIDS while COST 2102 Action is entitled Cross Modal Analysis of Verbal and Non verbal Communication The aim of COST 2101 is to investigate novel technologies for unsupervised multimodal biometric authentication systems using a new generation of biometrics enabled identity documents and smart cards COST 2102 is devoted to develop an advanced acoustical perceptual and psychological analysis of verbal and non verbal communication signals originating in spontaneous face to face interaction in order to identify algorithms and automatic procedures capable of recognizing human emotional states

**Virtual Immersive and 3D Learning Spaces: Emerging Technologies and Trends** Hai-Jew, Shalin, 2010-09-30 Virtual Immersive and 3D Learning Spaces Emerging

Technologies helps push the conceptual and applied boundaries of virtual immersive learning Virtual immersive spaces bring with them plenty of promise of sensory information rich learning experiences that will enable a much wider range of experiential learning and training delivered to computer desktops augmented reality spaces digital installations and mobile projective devices This work explains how these spaces may be exploited for effective learning in terms of the technologies pedagogical strategies and directions

**Verbal and Nonverbal Communication Behaviours** Anna Esposito, Marcos Faundez-Zanuy, Eric Keller, Maria Marinaro, 2007-10-06 This book constitutes the thoroughly refereed post proceedings of the COST Action 2102 International Workshop on Verbal and Nonverbal Communication Behaviours held in Vietri sul Mare Italy in March 2007 The twenty six revised full papers presented together with one introductory paper comprise carefully reviewed and selected participants contributions and invited lectures given at the workshop The papers are organized in topical sections

**Emotion-Oriented Systems** Paolo Petta, Catherine Pelachaud, Roddy Cowie, 2011-02-04 Emotion pervades human life in general and human communication in particular and this sets information technology a challenge Traditionally IT has focused on allowing people to accomplish practical tasks efficiently setting emotion to one side That was acceptable when technology was a small part of

life but as technology and life become increasingly interwoven we can no longer ask people to suspend their emotional nature and habits when they interact with technology The European Commission funded a series of related research projects on emotion and computing culminating in the HUMAINE project which brought together leading academic researchers from the many related disciplines This book grew out of that project and its chapters are arranged according to its working areas theories and models signals to signs data and databases emotion in interaction emotion in cognition and action persuasion and communication usability and ethics and good practice The fundamental aim of the book is to offer researchers an overview of the related areas sufficient for them to do credible work on affective or emotion oriented computing The book serves as an academically sound introduction to the range of disciplines involved technical empirical and conceptual and will be of value to researchers in the areas of artificial intelligence psychology cognition and user machine interaction

**Audiovisual Speech Processing** Gérard Bailly,Pascal Perrier,Eric Vatikiotis-Bateson,2012-04-26 When we speak we configure the vocal tract which shapes the visible motions of the face and the patterning of the audible speech acoustics Similarly we use these visible and audible behaviors to perceive speech This book showcases a broad range of research investigating how these two types of signals are used in spoken communication how they interact and how they can be used to enhance the realistic synthesis and recognition of audible and visible speech The volume begins by addressing two important questions about human audiovisual performance how auditory and visual signals combine to access the mental lexicon and where in the brain this and related processes take place It then turns to the production and perception of multimodal speech and how structures are coordinated within and across the two modalities Finally the book presents overviews and recent developments in machine based speech recognition and synthesis of AV speech Ambient Intelligence Giuseppe Riva,2005 The metaphor of Ambient Intelligence AmI tries to picture a vision of the future where all of us will be surrounded by intelligent electronic environments and this ambient has claims to being sensitive and responsive to our needs Ambient Intelligence without invasion of privacy represents a long term vision for the EU Information Society Technologies Research programme A strong multi disciplinary and collaborative approach is a key requirement for large scale technology innovation and the development of effective applications Up to now most of the books and papers related to AmI focus their analysis on the technology potential only An important feature of this volume is the link between the technology through the concepts of ubiquitous computing and intelligent interface and the human experience of interacting in the world through a neuro psychological vision centred on the concept of presence Presence the sense of being there is the experience of projecting one s mind through media to other places people and designed environments The combination of recent discoveries in cognitive neuroscience which make it possible to acquire a better understanding of the human aspects of presence and the breakthroughs at the level of the enabling technologies make it increasingly possible to build novel systems based on this understanding The goal of this volume is to assess the technologies and processes that are behind the

AmI vision in order to help the development of state of the art applications More in detail this volume aims at supporting researchers and scientists interested in the understanding and exploiting the potential of AmI

**Data-Driven 3D Facial Animation** Zhigang Deng,Ulrich Neumann,2008 Data Driven 3D Facial Animation systematically describes the important techniques developed over the last ten years or so Comprehensive in scope the book provides an up to date reference source for those working in the facial animation field

**Emotion-Oriented Systems** Catherine Pelachaud,2013-02-07 The Affective Computing domain term coined by Rosalind Picard in 1997 gathers several scientific areas such as computer science cognitive science psychology design and art The humane machine interaction systems are no longer solely fast and efficient They aim to offer to users affective experiences user s affective state is detected and considered within the interaction the system displays affective state it can reason about their implication to achieve a task or resolve a problem In this book we have chosen to cover various domains of research in emotion oriented systems Our aim is also to highlight the importance to base the computational model on theoretical foundations and on natural data

**Multimedia Systems, Standards, and Networks** Atul Puri,2000-03-22 Describes ITU H H 323 and H 324 H 263 ITU T video and MPEG 4 standards systems and coding IP and ATM networks multimedia search and retrieval image retrieval in digital laboratories and the status and direction of MPEG 7
