Dr. Dobb's Journal , 1999 Small Memory Software James Noble, Charles Weir, 2001 The phenomenal increases in processing power and memory capacity of computing hardware over recent years have allowed manufacturers to produce smaller and smaller computer systems such as palmtop PCs smart cards and embedded control systems on domestic and industrial appliances New techniques such as dynamic memory management and object orientation help programming but tend to require additional memory Standard programming techniques do not cope with these limited memory capacity environments This book will provide practical help for programmers developing software for this kind of environment The major content is a series of patterns developed by the authors based on solutions which have been found to work in real life situations They range from small system design patterns and process management patterns to patterns for User Interface development compression and memory storage This book will appeal to developers using Windows CE or building mobile telephones smart cards embedded devices set top computers in short all programmers working with memory constrained systems

PRO XSL, CAGLE, 2001-04-26 XSL is a vital companion to XML and is used for two main purposes to format or style XML data like Cascading Stylesheets so that it can be displayed in a browser and to transform XML data When you transform an XML document you manipulate the data into a new structure for example re ordering the data This enables the same data store to be used in an unlimited number of ways It is the transformation ability that gives XSL and therefore XML its real power You can imagine XSL as a bridging mechanism between your XML data store and the browser It does a similar job to ASP but it is platform independent XSL can also be used to transform XML into other text formats eg HTML Pro XSL demonstrates how to decide which technique to use and how to fit XSL into the development of practical applications It also shows how to implement the data transformation processes in order to filter sort

or change the structure of data and add style for presentation purposes *MSDN Magazine* ,2005 **The British**
