Harvesting History Daniel P. Ott,2023 Harvesting History explores how the highly contentious claim of Cyrus McCormick s 1831 invention of the reaper came to be incorporated into the American historical canon as a fact Spanning the late 1870s to the 1930s Daniel P Ott reveals how the McCormick family and various affiliated businesses created a usable past about their departed patriarch Cyrus McCormick and his role in creating modern civilization through advertising and the emerging historical profession The mythical invention narrative was widely peddled for decades by salesmen and in catalogs as well as in corporate public education campaigns and eventually in history books

to justify the family's elite position in American society and its monopolistic control of the harvester industry in the face of political and popular antagonism. As a parallel story to the McCormicks' manipulation of the past Harvesting History also provides a glimpse of the nascent discipline of history during the Progressive Era. Early historians were anxious to demonstrate their value in the new corporate economy as modern professionals and objective guardians of the past. While ethics might have prevented them from being historians for hire, their own desire for inclusion in the emerging middle class predisposed them to be receptive to the McCormicks' financial influence as well as their historical messages. *Strategies in Overcoming the Chemoresistance in Colorectal Cancer* Veronika Vymetalkova, Tomas Buchler, Sona Vodenkova, 2023-10-27

Difficult Decisions in Head and Neck Oncologic Surgery Zhen Gooi, Nishant Agrawal, 2019-07-12 This book provides a practical guide to decision making in head and neck oncologic surgery. As new technology is introduced, there is increasing knowledge regarding the efficacy of traditional head and neck surgical therapies, and how to select among these varied and complex approaches is becoming increasingly difficult. Concise, easy-to-follow chapters are devoted to one or two specific questions or decisions in head and neck oncologic surgery, aiding the reader to develop their decision-making skills. *Difficult Decisions in Head and Neck Oncologic Surgery* is a timely reference source for practicing surgeons, surgeons in training, and educators on the recommended ideal approaches in selected clinical situations. **MSS** John Gardner, Liz Rosenberg, 1980

The advance uncorrected proofs of a book that was never published. In the early 1960s, Gardner edited the journal *MSS* and he revived it briefly two decades later, but the project floundered after a few issues. This anthology intended to kick off the new *MSS* includes a six-page introduction by Gardner about the original journal and it reprints from the original ten short stories by Joyce Carol Oates, William Gass, John Hawkes, and others. This anthology project was never officially published, leaving this proof as evidence of the effort. It has been estimated that in 2022, in the US, 106,180 and 44,850 new cases of colon and rectal cancer occurred, respectively. Overall, colorectal cancer is the third leading cause of cancer-related deaths in the United States. However, the death rate for colorectal cancer has been dropping in the last decades. One of the main reasons for these results is the introduction of screening programs and the improvement of the treatment protocols, including chemotherapy, radiotherapy, and surgery. Despite these encouraging results, colorectal cancers are still responsible for local recurrence and distant metastases. These conditions significantly worsen patients' overall survival and disease-free survival. However, also for the treatment of these advanced stages, a great effort has been done in
