'Guilty Women', Foreign Policy, and Appeasement in Inter-War Britain Julie V. Gottlieb, 2016-02-07 British women were deeply invested in foreign policy between the wars This study casts new light on the turn to international affairs in feminist politics the gendered representation and experience of the Munich Crisis and the profound impression made by female public opinion on PM Neville Chamberlain in his negotiations with the dictators **Public Opinion and the End of**

Appeasement in Britain and France Daniel Hucker, 2016-04-15 The 1930s policy of appeasement is still fiercely debated by historians critics and contemporary political commentators more than 70 years after the signing of the 1938 Munich Agreement What is less well understood however is the role of public opinion on the formation of British and French policy in the period between Munich and the outbreak of the Second World War not necessarily what public opinion was but how it was perceived to be by those in power and how this contributed to the policymaking process It therefore fills a considerable gap in an otherwise vast literature seeking to ascertain the extent to which public opinion can be said to have influenced the direction of foreign policy in a crucial juncture of British and French diplomatic history Employing an innovative and unique methodological framework the author distinguishes between two categories of representation firstly reactive representations of opinion the immediate and spontaneous reactions of the public to circumstances and events as they occur and secondly residual representations which can be defined as the remnants of previous memories and experiences the more general tendencies of opinion considered characteristic of previous years even previous decades It is argued that the French government of douard Daladier was consistently more attuned to the evolution of reactive representations than the British government of Neville Chamberlain and consequently it was the French rather than the British who first pursued a firmer policy towards the European dictatorships This comparative approach reveals a hitherto hidden facet of the diplomatic prelude to the Second World War that British policy towards France and French policy towards Britain were influenced by their respective perceptions of public opinion in the other country A sophisticated analysis of a crucial period in international history this book will be essential reading for scholars of the origins of World War II the political scenes of late 1930s Britain and France and the study of public opinion and its effects on policy **Public Opinion and the End of Appeasement in**

Britain and France Dr Daniel Hucker, 2013-07-28 The 1930s policy of appeasement is still fiercely debated by historians critics and contemporary political commentators more than 70 years after the signing of the 1938 Munich Agreement What is less well understood however is the role of public opinion on the formation of British and French policy in the period between Munich and the outbreak of the Second World War not necessarily what public opinion was but how it was perceived to be by those in power and how this contributed to the policymaking process It therefore fills a considerable gap in an otherwise vast literature seeking to ascertain the extent to which public opinion can be said to have influenced the direction of foreign policy in a crucial juncture of British and French diplomatic history Employing an innovative and unique methodological

framework the author distinguishes between two categories of representation firstly reactive representations of opinion the immediate and spontaneous reactions of the public to circumstances and events as they occur and secondly residual representations which can be defined as the remnants of previous memories and experiences the more general tendencies of opinion considered characteristic of previous years even previous decades It is argued that the French government of douard Daladier was consistently more attuned to the evolution of reactive representations than the British government of Neville Chamberlain and consequently it was the French rather than the British who first pursued a firmer policy towards the European dictatorships This comparative approach reveals a hitherto hidden facet of the diplomatic prelude to the Second World War that British policy towards France and French policy towards Britain were influenced by their respective perceptions of public opinion in the other country A sophisticated analysis of a crucial period in international history this book will be essential reading for scholars of the origins of World War II the political scenes of late 1930s Britain and France and the study of public opinion and its effects on policy

Public Opinion and Twentieth-Century Diplomacy Daniel Hucker, 2020-02-20 Public Opinion and 20th Century Diplomacy explores both the influence of public opinion on diplomatic decision making in international history and its emergence as a legitimate field of study for international historians The book uses five case studies to examine the impact of public opinion on the high politics of diplomacy Incorporating a variety of methodological approaches the book looks at British policy at the Paris Peace Conference French policy in the era of 1930s appeasement Policy choices of the US during the Vietnam War Global responses to apartheid era South Africa Public attitudes across the EU regarding European integration This book demonstrates the vibrancy of public opinion research to date and the possibilities for future lines of study

Reporting the Second World War Tim Luckhurst, 2023-01-12 The decisive role of Britain s wartime newspaper journalism in shaping public opinion and government policy has been majorly overlooked Much of the existing historiography has framed Britain s newspapers as mouthpieces of state propaganda readily conforming to the wishes of the wartime coalition Tim Luckhurst challenges this through an analysis of illuminating and largely forgotten controversies which underscore the function the press held as guardians of democracy and propagators of dissenting opinion in British politics and society from the overseas evacuation of children to the Allies carpet bombing of German cities Reporting the Second World War is a timely and important intervention that duly recognises the place of

national regional and specialist titles in speaking truth to power in a democracy at war **Neville Chamberlain's Legacy**
Nicholas Milton, 2019-12-27 A biography reassessing the man whose name became a synonym for appeasement An important read for anyone with an interest in the prelude to World War II The NYMAS Review Neville Chamberlain has gone down in history as the architect of appeasement the prime minister who by sacrificing Czechoslovakia at Munich in September 1938 put Britain on an inevitable path to war In this radical new appraisal of one of the most vilified politicians of the twentieth century historian Nicholas Milton claims that by placating Hitler Chamberlain not only reflected public opinion but also embraced the zeitgeist of the time Chamberlain also bought Britain vital time to rearm when Hitler's military machine was at its zenith It is with the hindsight of history that we understand Chamberlain's failure to ultimately prevent a war from happening Yet by placing him within the context of his time this fascinating new history provides a unique perspective into the lives and mindset of the people of Britain during the lead up to the Second World War Never before have Chamberlain's letters been accessed to tell the story of his life and work They shed new light on his complex character and enable us to consider Chamberlain the man not just the statesman His role as a pioneer of conservation is revealed alongside his work in improving midwifery and championing the introduction of widows pensions Neville Chamberlain's Legacy is a reminder that there is often more to political figures than many a quick judgment allows
