Sellers, 2023-08-15 Race and the Greening of Atlanta turns an environmental lens on Atlanta s ascent to thriving capital of the Sunbelt over the twentieth century Uniquely wide ranging in scale from the city s variegated neighborhoods up to its place in regional and national political economies this book reinterprets the fall of Jim Crow as a democratization born of two metropolitan movements a well known one for civil rights and a lesser known one on behalf of the environment Arising out of Atlanta s Black and white middle classes respectively both movements owed much to

New Deal capitalism's undermining of concentrated wealth and power if not racial segregation in the Jim Crow South Placing these two movements on the same historical page Christopher C Sellers spotlights those environmental inequities, ideals and provocations that catalyzed their divergent political projects. He then follows the intermittent, sometimes vital alliances they struck as civil rights activists tackled poverty as a new environmental state arose and as Black politicians began winning elections. Into the 1980s as a wealth concentrating style of capitalism returned to the city and Atlanta became a national poster child for sprawl, the seedbeds spread both for a national environmental justice movement and for an influential new style of antistatism. Sellers contends that this new conservatism, sweeping the South with an anti-environmentalism and budding white nationalism that echoed the region's Jim Crow past, once again challenged the democracy Atlantans had achieved. Superbia! Dan Chiras, Dave Wann, 2009-03-01 The only book that shows how to transform existing suburbs to create environment and people friendly neighborhoods **Designing Healthy Communities** Richard J.

Jackson, 2011-09-19 *Designing Healthy Communities* the companion book to the acclaimed public television documentary highlights how we design the built environment and its potential for addressing and preventing many of the nation's devastating childhood and adult health concerns. Dr. Richard Jackson looks at the root causes of our malaise and highlights healthy community designs achieved by planners, designers and community leaders working together. Ultimately, Dr. Jackson encourages all of us to make the kinds of positive changes highlighted in this book. 2012 Nautilus Silver Award Winning Title in category of Social Change. In this book, Dr. Jackson inhabits the frontier between public health and urban planning, offering us hopeful examples of innovative transformation and ends with a prescription for individual action. This book is a must read for anyone who cares about how we shape the communities and the world that shapes us. Will Rogers, president and CEO, The Trust for Public Land. While debates continue over how to design cities to promote public health, this book highlights the profound health challenges that face urban residents and the ways in which certain aspects of the built environment are implicated in their etiology. Jackson then offers up a set of compelling cases showing how local activists are working to fight obesity, limit pollution exposure, reduce auto dependence, rebuild economies and promote community and sustainability. Every city planner and urban designer should read these cases and use them to inform their everyday practice. Jennifer Wolch, dean, College of Environmental Design, William W. Wurster Professor, City and Regional Planning, UC Berkeley. Dr. Jackson has written a thoughtful text that illustrates how and why building healthy communities is the right prescription for America. A new generation is seeking greater excitement.

and diversity than the typical suburban subdivision offers and many people are instead looking to make their homes in lively urban environments In *Intown Living* authors Ann Breen and Dick Rigby document this movement arguing that if properly nurtured it could help slow current patterns of sprawling development and help revitalize America's cities They illustrate the many benefits of city living and offer strategies and encouragement for public officials and private developers to team up and expand central city housing opportunities The authors present in depth studies of eight cities Atlanta Dallas Houston Memphis Minneapolis New Orleans Portland Oregon and Vancouver British Columbia that are experiencing this type of renaissance and consider common elements shared by the cities as well as their differences *Intown Living* is an important new resource for a wide audience of professionals involved with urban design and planning It will also be of interest to the many people concerned with historic preservation or smart growth and for students and researchers involved with urban studies and related fields

Ecopolis Paul F. Downton, 2008-12-09 From 2008 for the first time in human history half of the world's population now live in cities Yet despite a wealth of literature on green architecture and planning there is to date no single book which draws together theory from the full range of disciplines from architecture planning and ecology which we must come to grips with if we are to design future cities which are genuinely sustainable Paul Downton's *Ecopolis* takes a major step along this path It highlights the urgent need to understand the role of cities as both agents of change and means of survival at a time when climate change has finally grabbed world attention and it provides a framework for designing cities that integrates knowledge both academic and practical from a range of relevant disciplines Identifying key theorists practitioners places and philosophies the book provides a solid theoretical context which introduces the concept of urban fractals and goes on to present a series of design and planning tools for achieving Sustainable Human Ecological Development

SHED Combining knowledge from diverse fields to present a synthesis of urban ecology the book will provide a valuable resource for students researchers and practitioners in architecture construction planning geography and the traditional life sciences
