Phenomenology And The Social Sciences:

The Phenomenology of the Social World Alfred Schutz, 1967 In this book his major work Alfred Schutz attempts to provide a sound philosophical basis for the sociological theories of Max Weber Using a Husserlian phenomenology Schutz provides a complete and original analysis of human action and its intended meaning *Phenomenology and the Social Sciences* Maurice Natanson, 1973 The idea of this anthology is to explore the relationships between phenomenology and the social sciences **Phenomenology and the Social World** Laurie Spurling, 2013-10-15 The term phenomenology has become almost as over used and emptied of meaning as that other word from Continental Philosophy namely existentialism Yet Husserl who first put forward the phenomenological method considered it a rigorous alternative to positivism and in the hands of Merleau Ponty a disciple of Husserl in France phenomenology became a way of gaining a disciplined and coherent perspective on the world in which we live When this study originally published in 1977 there were only a few books in English on Merleau Ponty s philosophy It introduced the reader and suggested how his thought might throw light on some of the assumptions and presuppositions of certain contemporary forms of Anglo Saxon philosophy and social science It also demonstrates how phenomenology seeks to unite philosophy and social science rather than define them as mutually exclusive domains of knowledge **Collected Papers V. Phenomenology and the Social Sciences** Alfred Schutz, 2011-08-31 This book shows how phenomenology of the social sciences differs from positivistic approaches and presents Schutz s theory of relevances a key feature of his own phenomenology of the social world It begins with Schutz s appraisal of how Husserl influenced him and continues with exchanges between Schutz and Eric Voegelin Felix Kaufmann Aron Gurwitsch and Talcott Parsons This book presents for the first time Schutz s incisive criticisms of T S Eliot s theory of culture [The Interrelation of Phenomenology, Social Sciences and the Arts](#) Michael Barber, Jochen Dreher, 2013-11-04 This book features papers written by renowned international scholars that analyze the interdependence of art phenomenology and social science The papers show how the analysis of the production as well as the perception and interpretation of art work needs to take into consideration the subjective viewpoint of the artist in addition to that of the interpreter Phenomenology allows a description of the subjectively centered life world of the individual actor artist or interpreter and the objective structures of literature music and the aesthetic domain in general The perspective of social science serves to reconstruct the socio historical structure involved in the creation and reception of the art work The authors concentrate on this specific theoretical focus which combines both phenomenology and social science and offers an innovative framework for the analysis of works of art from the fields of literature music visual arts photography and film Some of the contributions present creative interpretations of a variety of distinct art works in addition to the realization of theoretical reflections on the interdependence of arts phenomenology and social science This book features papers that were presented at the international and interdisciplinary conference Phenomenology Social Sciences and the Arts held at the University of Konstanz May 2009 in commemoration of

philosopher and social scientist Alfred Schutz the developer of phenomenologically oriented sociology It will appeal to researchers scholars and students in phenomenology social sciences art theory and the arts *Phenomenology and the Social Sciences* ,1978 *Phenomenology and the Social Sciences* Maurice Natanson,1973 *Phenomenology and The Social Science: A Dialogue* Joseph Bien,2012-12-06 The five essays in this work attempt in interpretive and original ways to further the common field of investigation of man in the life world Richard Zaner in his examination of the multi level approach of the social sciences to the social order points us toward essences and the manner in which they are epistemically understood By contrasting the work of the later Durkheim with that of Husserl Edward Tiryakian is able to suggest a commonality of endeavor between them Paul Ricoeur after phenomenologically distinguishing three concepts of ideology examines the supposed conflict between science and ideology and its resolution through a hermeneutics of historical understanding Maurice N at anson in his discussion of the problem of anonymity reflects on both the sociological givenness of the world and its phenomenological reconstruction showing the necessary interrelationship of both prior ities Fred Dallmayr after a presentation of the state of validation in the social sciences and their problems in attempting to ground them selves either in regard to logical positivism or phenomenology refers us to the perspective of Merleau Ponty concerning the relationship of cognition and experience *Phenomenology, Language and the Social Sciences* Maurice Roche,2013-10-23 This book looks at two revolutions in philosophy phenomenology and conceptual analysis which have been influential in sociology and psychology It discusses humanistic psychiatry and sociological approaches to the specific area of mental illness which counter the ultimately reductionist implications of Freudian psycho analytic theory The book originally published in 1973 concludes by stating the broad underlying themes of the two forms of humanistic philosophy and indicating how they relate to the problems of theory and method in sociology **Phenomenology and the Social Sciences. Vol. 2** M. Natanson,1973 *Phenomenology and The Social Science* Joseph Bien,1978-11 The five essays in this work attempt in interpretive and original ways to further the common field of investigation of man in the life world Richard Zaner in his examination of the multi level approach of the social sciences to the social order points us toward essences and the manner in which they are epistemically understood By contrasting the work of the later Durkheim with that of Husserl Edward Tiryakian is able to suggest a commonality of endeavor between them Paul Ricoeur after phenomenologically distinguishing three concepts of ideology examines the supposed conflict between science and ideology and its resolution through a hermeneutics of historical understanding Maurice N at anson in his discussion of the problem of anonymity reflects on both the sociological givenness of the world and its phenomenological reconstruction showing the necessary interrelationship of both prior ities Fred Dallmayr after a presentation of the state of validation in the social sciences and their problems in attempting to ground them selves either in regard to logical positivism or phenomenology refers us to the perspective of Merleau Ponty concerning the relationship of cognition and experience *Felix Kaufmann's Theory and Method in the*

Social Sciences Robert S. Cohen, Ingeborg K. Helling, 2014-05-19 This volume contains the English translation of Felix Kaufmann's 1895/1945 main work *Methodenlehre der Sozialwissenschaften* 1936 In this book Kaufmann develops a general theory of knowledge of the social sciences in his role as a cross border commuter between Husserl's phenomenology, Kelsen's pure theory of law and the logical positivism of the Vienna Circle This multilayered inquiry connects the value oriented reflections of a general philosophy of science with the specificity of the methods and theories of the social sciences as opposed to abstract natural science and psychology The core focus of the study is the attempt to elucidate how and under what conditions scientific knowledge about social facts empirically justified and theoretically embedded can be obtained The empirical basis of knowledge within the social sciences forms a phenomenological concept of experience According to Kaufmann this concept of experience exhibits a complex structure Within the meaning interpretation of human action as the core of knowledge in the social sciences this structure reaches out across the isolated act of verification toward the synthesis of external and internal experiences The book opens with a detailed and useful introduction by Ingeborg K Helling which introduces the historical and theoretical background of Kaufmann's study and specifically illuminates his relation to Alfred Schütz and John Dewey Finally it contains interviews with and letters to members of his family colleagues and students

Phenomenology and the Social Sciences Willibrordus Carolus Laurentius Hoorn, 1969 *Phenomenology and Social Reality* Maurice Natanson, 2012-12-06 Alfred Schutz was born in Vienna on April 13 1899 and died in New York City on May 20 1959 The year 1969 then marks the seventieth anniversary of his birth and the tenth year of his death The essays which follow are offered not only as a tribute to an irreplaceable friend colleague and teacher but as evidence of the contributors' conviction of the eminence of his work No special pleading is needed here to support that claim for it is widely acknowledged that his ideas have had a significant impact on present day philosophy and phenomenology of the social sciences In place of either argument or evaluation I choose to restrict myself to some biographical information and a fragmentary memoir The only child of Johanna and Otto Schutz an executive in a private bank in Vienna Alfred attended the Esterhazy Gymnasium in Vienna an academic high school whose curriculum included eight years of Latin and Greek He graduated at seventeen in time to spend one year of service in the Austrian army in the First World War For bravery at the front on the battlefield in Italy he was decorated by his country After the war ended he entered the University of Vienna completing a four year curriculum in only two and one half years and receiving his doctorate in Law **The Dual Vision** Robert

Gorman, 2013-10-08 This study originally published in 1977 focuses on a critical examination of the life work of Alfred Schutz the most important and influential father of several recent schools of empirical social research The author shows why Schutz and his followers fail in their attempts to humanize empirical social science The problems they encounter he argues are due to their attempt to achieve a methodological synthesis of self-determining subjectivity and empirical criteria of validation based on Schutz's heuristic adoption of relevant ideas from Weber and Husserl This is in effect an artificial union of

subjectivity and objectivity their dual vision that satisfies neither phenomenological nor naturalist perspectives Dr Gorman suggests that the radical implications of phenomenology must lead to a consistent socially conscious method of inquiry and in a final chapter he re defines the methodological implications of phenomenology with the aid of existential and Marxist categories Literature, Philosophy, and the Social Sciences Maurice Natanson, 2012-12-06 A collection of one man's essays in book form tends to be viewed today with some suspicion if not hostility by philosophical critics It would seem that the author is guilty of an academic sin of pride causing or helping to cause separately conceived articles to surpass their original station and assume a new life a grander articulation It can hardly be denied that the essays which follow must face this sullen charge for they were composed at different times for different sorts of audiences and for the most part have already been published Their appearance in a new form will not allay commonplace criticisms there are repetitions certain key terms are defined and defined again in various places a few quotations reappear and beyond this the essays are unequal in range depth and fundamental intent But it is what brings these essays together that constitutes I trust their collective merit Underlying the special arguments that are to be found in each of the chapters is a particular sense of reality not a thesis or a theory but rather a way of seeing the world and of appreciating its texture and design It is that sense of reality that I should like to speak of here Philosophy stands in a paradoxical relationship to mundane existence it is at once its critique and one of its possibilities The Idea of Social Science and Proper Phenomenology Jonathan Tuckett, 2018-06-11 This monograph examines an academic discipline in crisis The author claims that this field concerned with society and relationships is in trouble No one can seem to agree on what it does or how to go about doing it His insightful argument revives the thought of key phenomenologists often no longer considered in social science Looking predominantly at debates within religious studies this book uncovers certain misguided presuppositions which have strongly influenced scholars in the field This reflects itself in a Weberian Ideal regarding the institutional place of science in the universities and a failure to properly consider the epistemic status of knowledge produced for its own sake But even recognizing these issues will not get to the core of the crisis It will not help scholars better understand what it is to be human To address this the author digs deeper He draws on the philosophical phenomenology of Husserl's Phenomenological Movement to critique our very idea of social science In the process he presents a radical approach to the question of humanity This volume concludes that properly understood social science is a hobby It deserves no special place in the university Indeed if it is to be pursued properly it requires a fundamentally revised understanding of humanity The author argues this not of the sake of controversy Rather his intention is to affect the necessary shift in our understanding that will enable future constructive solutions **Alfred Schutz, Phenomenology, and the Renewal of Interpretive Social Science** Besnik Pula, 2024-04-16 In recent decades the historical social sciences have moved away from deterministic perspectives and increasingly embraced the interpretive analysis of historical process and social and political change This shift has enriched the field but also led to a deadlock

regarding the meaning and status of subjective knowledge Cultural interpretivists struggle to incorporate subjective experience and the body into their understanding of social reality In the early twentieth century philosopher Alfred Schutz grappled with this very issue Drawing on Edmund Husserl's phenomenology and Max Weber's historical sociology Schutz pioneered the interpretive analysis of social life from an embodied perspective However the recent interpretivist turn influenced by linguistic philosophies discourse theory and poststructuralism has overlooked the insights of Schutz and other phenomenologists This book revisits Schutz's phenomenology and social theory positioning them against contemporary problems in social theory and interpretive social science research The book extends Schutz's key concepts of relevance symbol relations theory of language and lifeworld meaning structures It outlines Schutz's critical approach to the social distribution of knowledge and develops his nascent sociology and political economy of knowledge This book will appeal to readers with interests in social theory phenomenology and the methods of interpretive social science including historical sociology cultural sociology science and technology studies political economy and international relations

THEODORE KISIEL Date of birth October 30 1930 Place of birth Brackenridge Pennsylvania Date of institution of highest degree PhD Duquesne University 1962 Academic appointments University of Dayton Canisius College Northwestern University Duquesne University Northern Illinois University I first left the university to pursue a career in metallurgical research and nuclear technology But I soon found myself drawn back to the university to round out an overly specialized education It was along this path that I was waylaid into philosophy by teachers like H L Van Breda and Bernard Boelen The philosophy department at Duquesne University was then 1958 1962 a veritable little Louvain and the Belgian Dutch connection exposed me to among other visiting scholars Jean Ladriere and Joe Kockelmans who planted the seeds which eventually led me to the hybrid discipline of a hermeneutics of natural science and prompted me soon after graduation to make the first of numerous extended visits to Belgium and Germany The endeavor to learn French and German led me to the task of translating the phenomenological literature bearing especially on natural science and on Heidegger The talk in the sixties was of a continental divide in philosophy between Europe and the Anglo American world But in designing my courses in the philosophy of science I naturally gravitated to the works of Hanson Kuhn Polanyi and Toulmin without at first fully realizing why I felt such a strong kinship with them beyond their common anti positivism

Ideas for a Hermeneutic Phenomenology of the Natural Sciences Joseph J. Kockelmans, 1993-07-31 I have always had a great interest in the philosophy of science At first this interest led to reflections on the mathematical sciences I later my focus shifted to the natural sciences 2 during the past twenty years or so my interest has also included the behavioral social and historical sciences From the very start my interest was always combined with a concern for the history of the sciences In philosophy of science proper my main interest was not in logical methodological or even epistemological issues although I obviously studied and taught the most important insights proposed in the leading publications in this large

field of study My concern has always been predominantly ontological and in that area I have approached the relevant issues from a 4 phenomenological perspective For what follows it is perhaps of some importance to mention here that I came to phenomenology in a rather indirect way through the philosophy of Nicolai Hartmann Yet it was mainly the influence of Herman Van Breda and Alphonse De Waelhens which led me directly to Husserl's phenomenology At first I focused almost exclusively on Husserl's phenomenology Later I moved in the direction of the philosophy of Merleau Ponty and 1 Cf Joseph J Kockelmans Philosophy of Mathematics in the Middle Ages in Dutch Langemark Vinkstee 1953 On the Mode of Being of Mathematical Entities in Dutch in Tijdschrift voor Philosophie 16 1954 pp 289 331 2 Joseph J Kockelmans On Time and Space
